Case: Organic Dairy Farm

By: Gaurav Joshi

Product & Platform Personas

Technology Product for 'Organic Dairy Farm'

User

- Sign-up
- Search for a product (milk or milk product)
- View details and reviews
- Place order

Front Desk Agent

- Search for a product (milk or milk product)
- View details and reviews
- Place order
- Check storage or available units

Admin

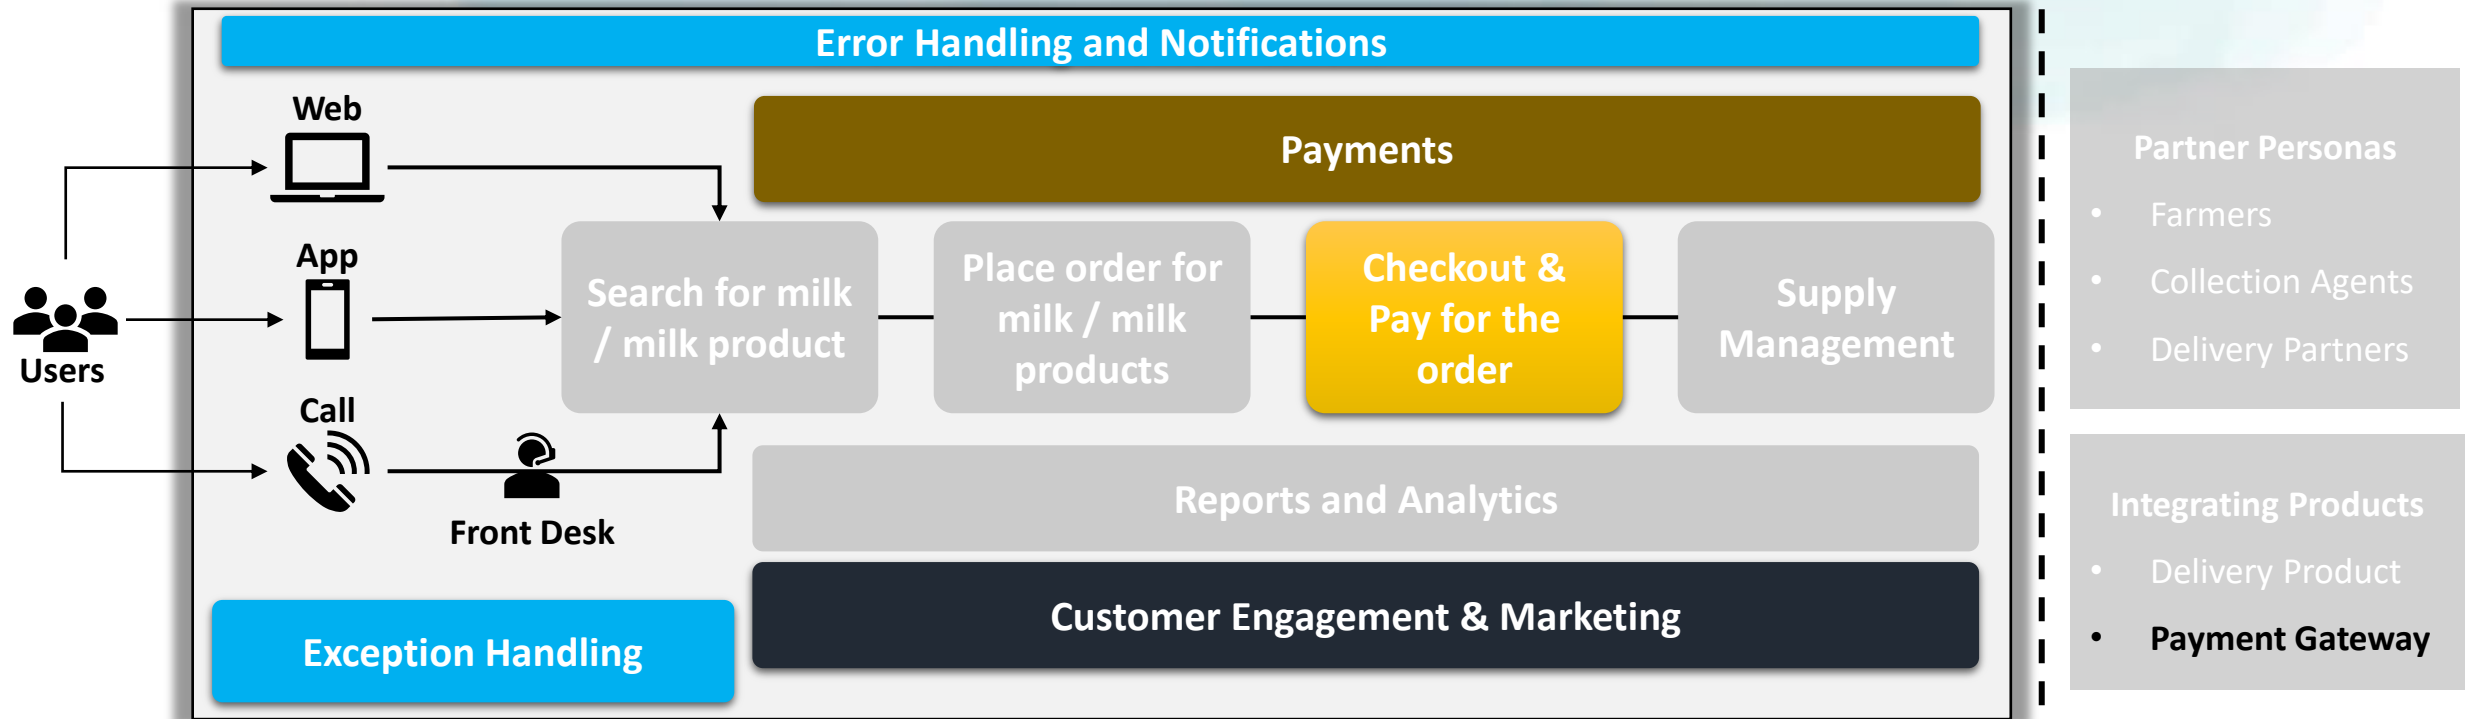

Catalogue Management

- Add product details
- Add images
- Select maximum units that can be ordered

Deals

- Enter deals to be displayed

Technology Product for 'Organic Dairy Farm'

User

- Add to cart
- Add / select profile (name, address etc.)
- Pay
- Pay extra to expedite the order

Front Desk Agent

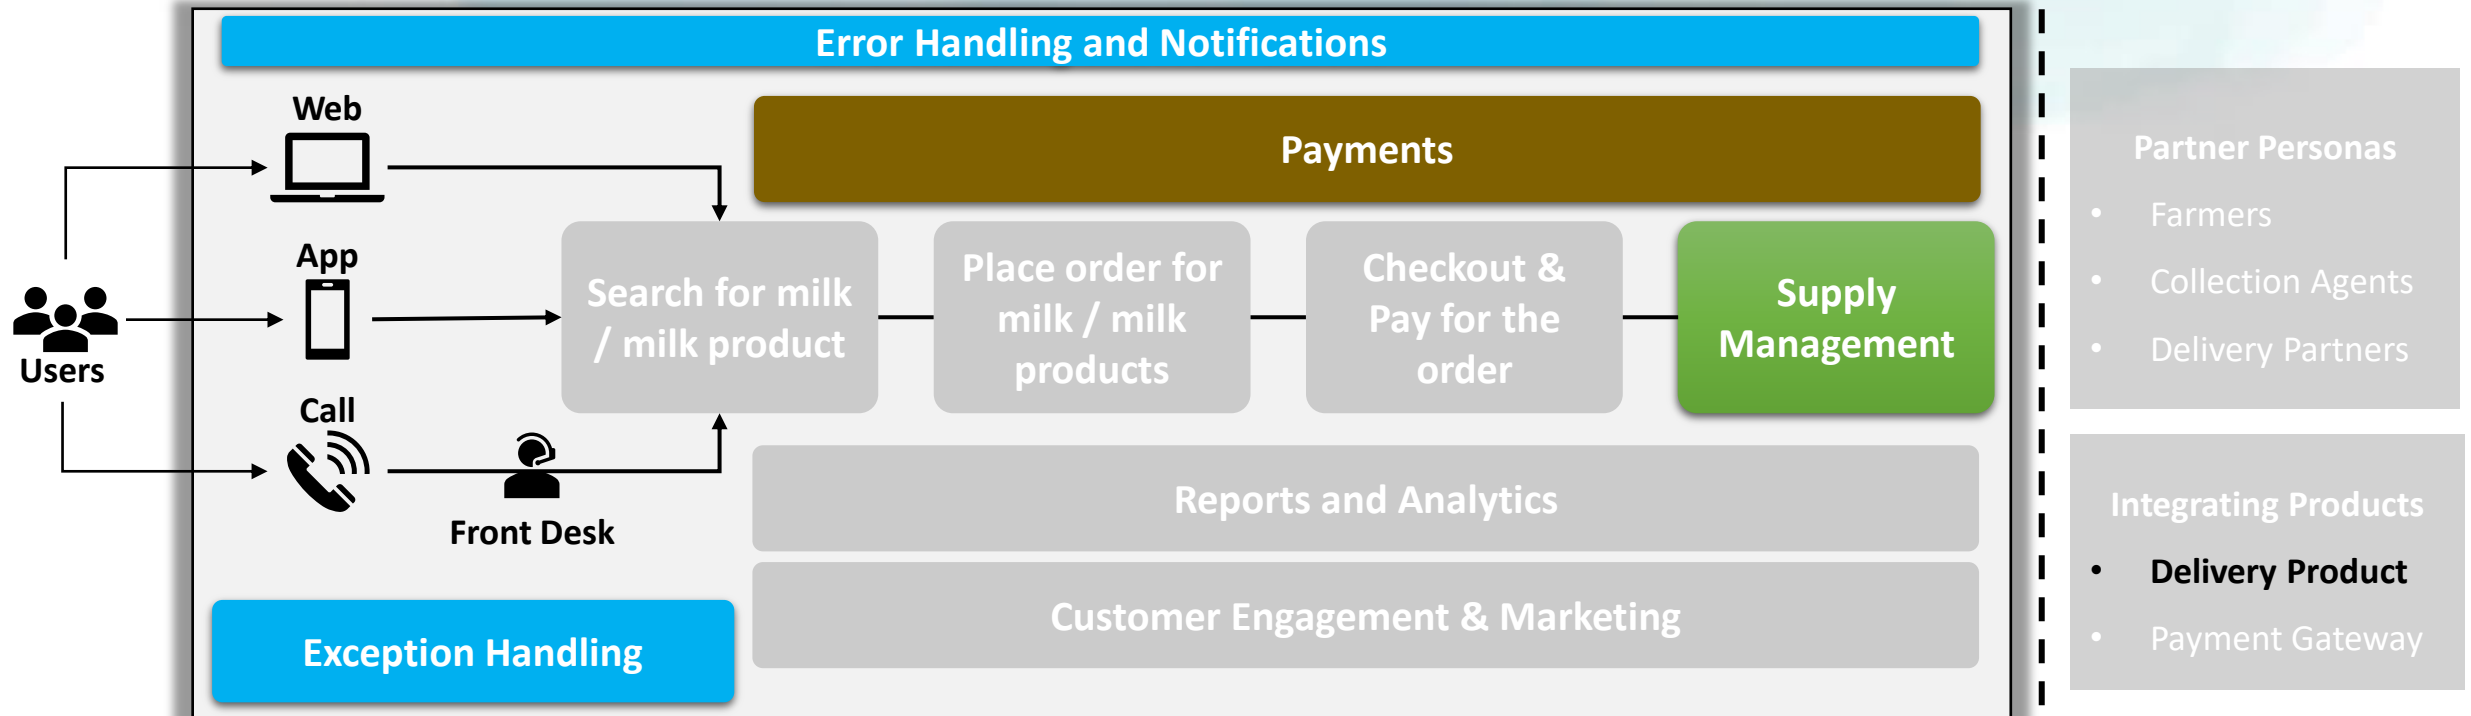

- Add to cart
- Add profile (name, address etc.)
- Generate payment link for user
- Tag order for expedited delivery

Admin

- Define profit margins for each dairy product
- Cross sell (E.g., enable milk products to be shown while user is buying milk)

Technology Product for 'Organic Dairy Farm'

Collector

Manage milk / milk product **in-flow**

- Milk provider details
- Fat content
- Quantity

Dispatcher

Manage milk / milk product **out-flow**

- Dispatch / delivery details
- Fat content
- Quantity

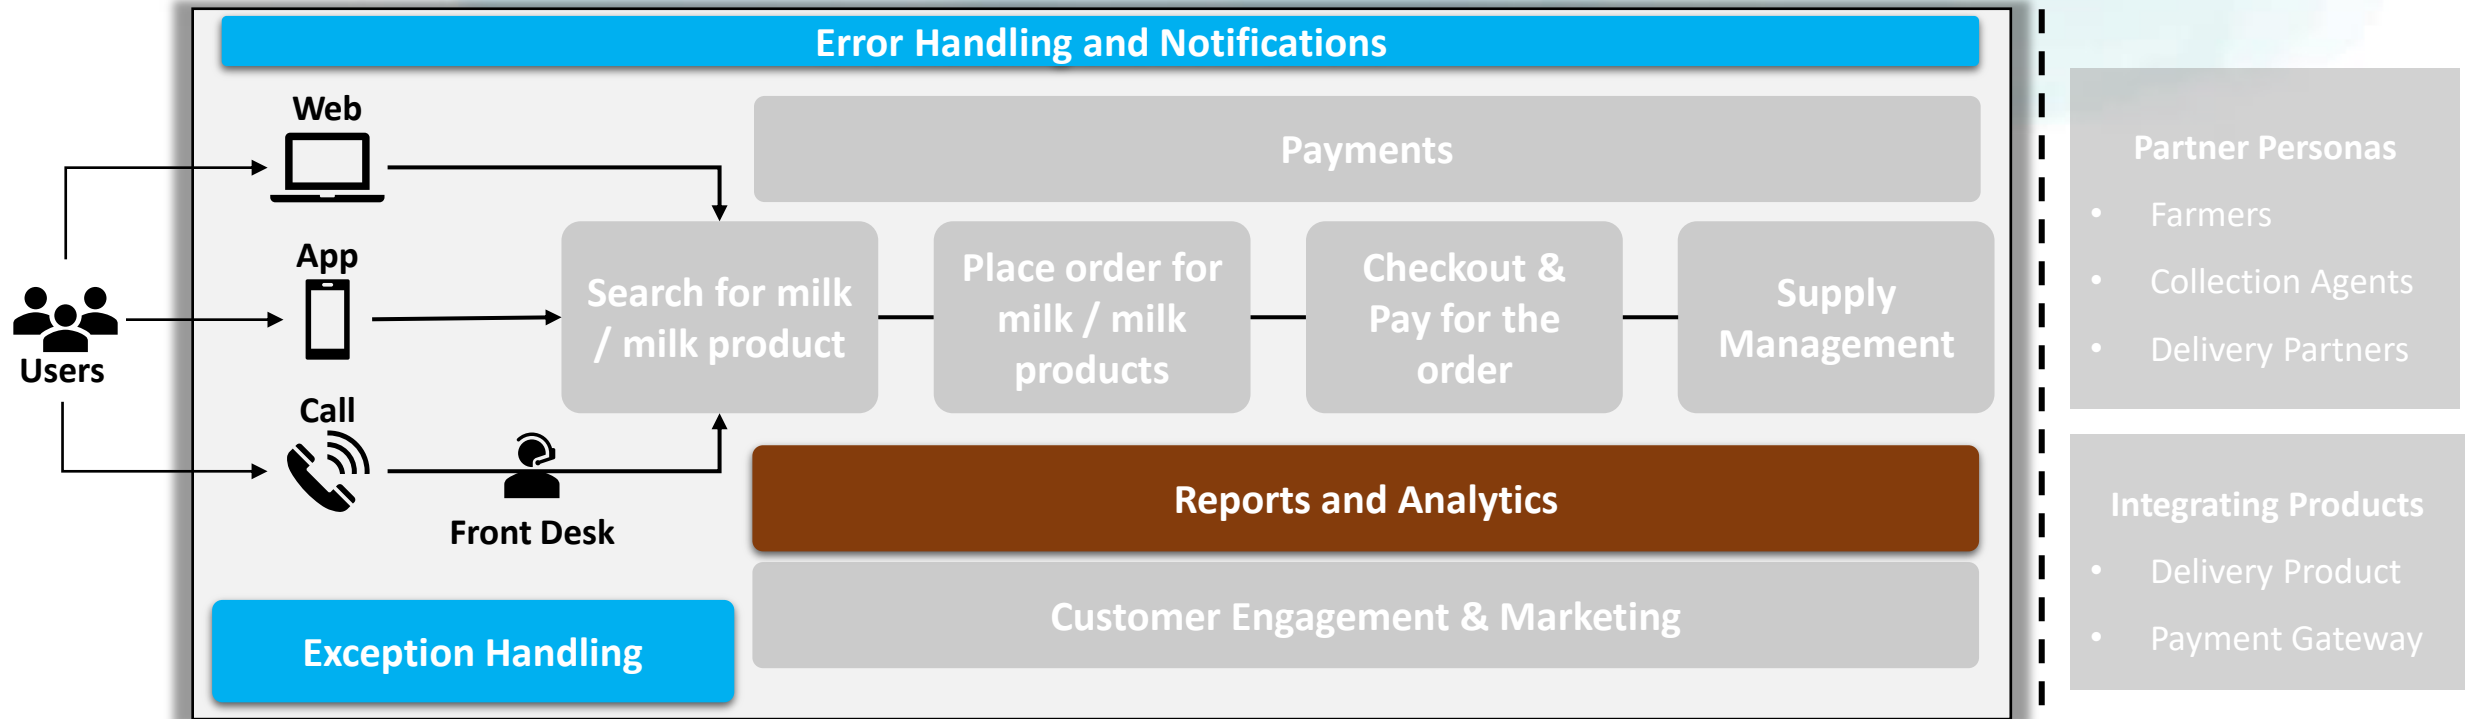

Storage Owner

Manage stored units (milk and milk products)

Fulfilment

- Book order from inventory
- Tag order with delivery partner
- Send confirmations / relevant notifications
- Track order for fulfillment

Technology Product for 'Organic Dairy Farm'

Management

- Demand vs supply tracking
- Failed delivery (delay or no delivery)
- Financials (Pricing models)
- Scenario generator

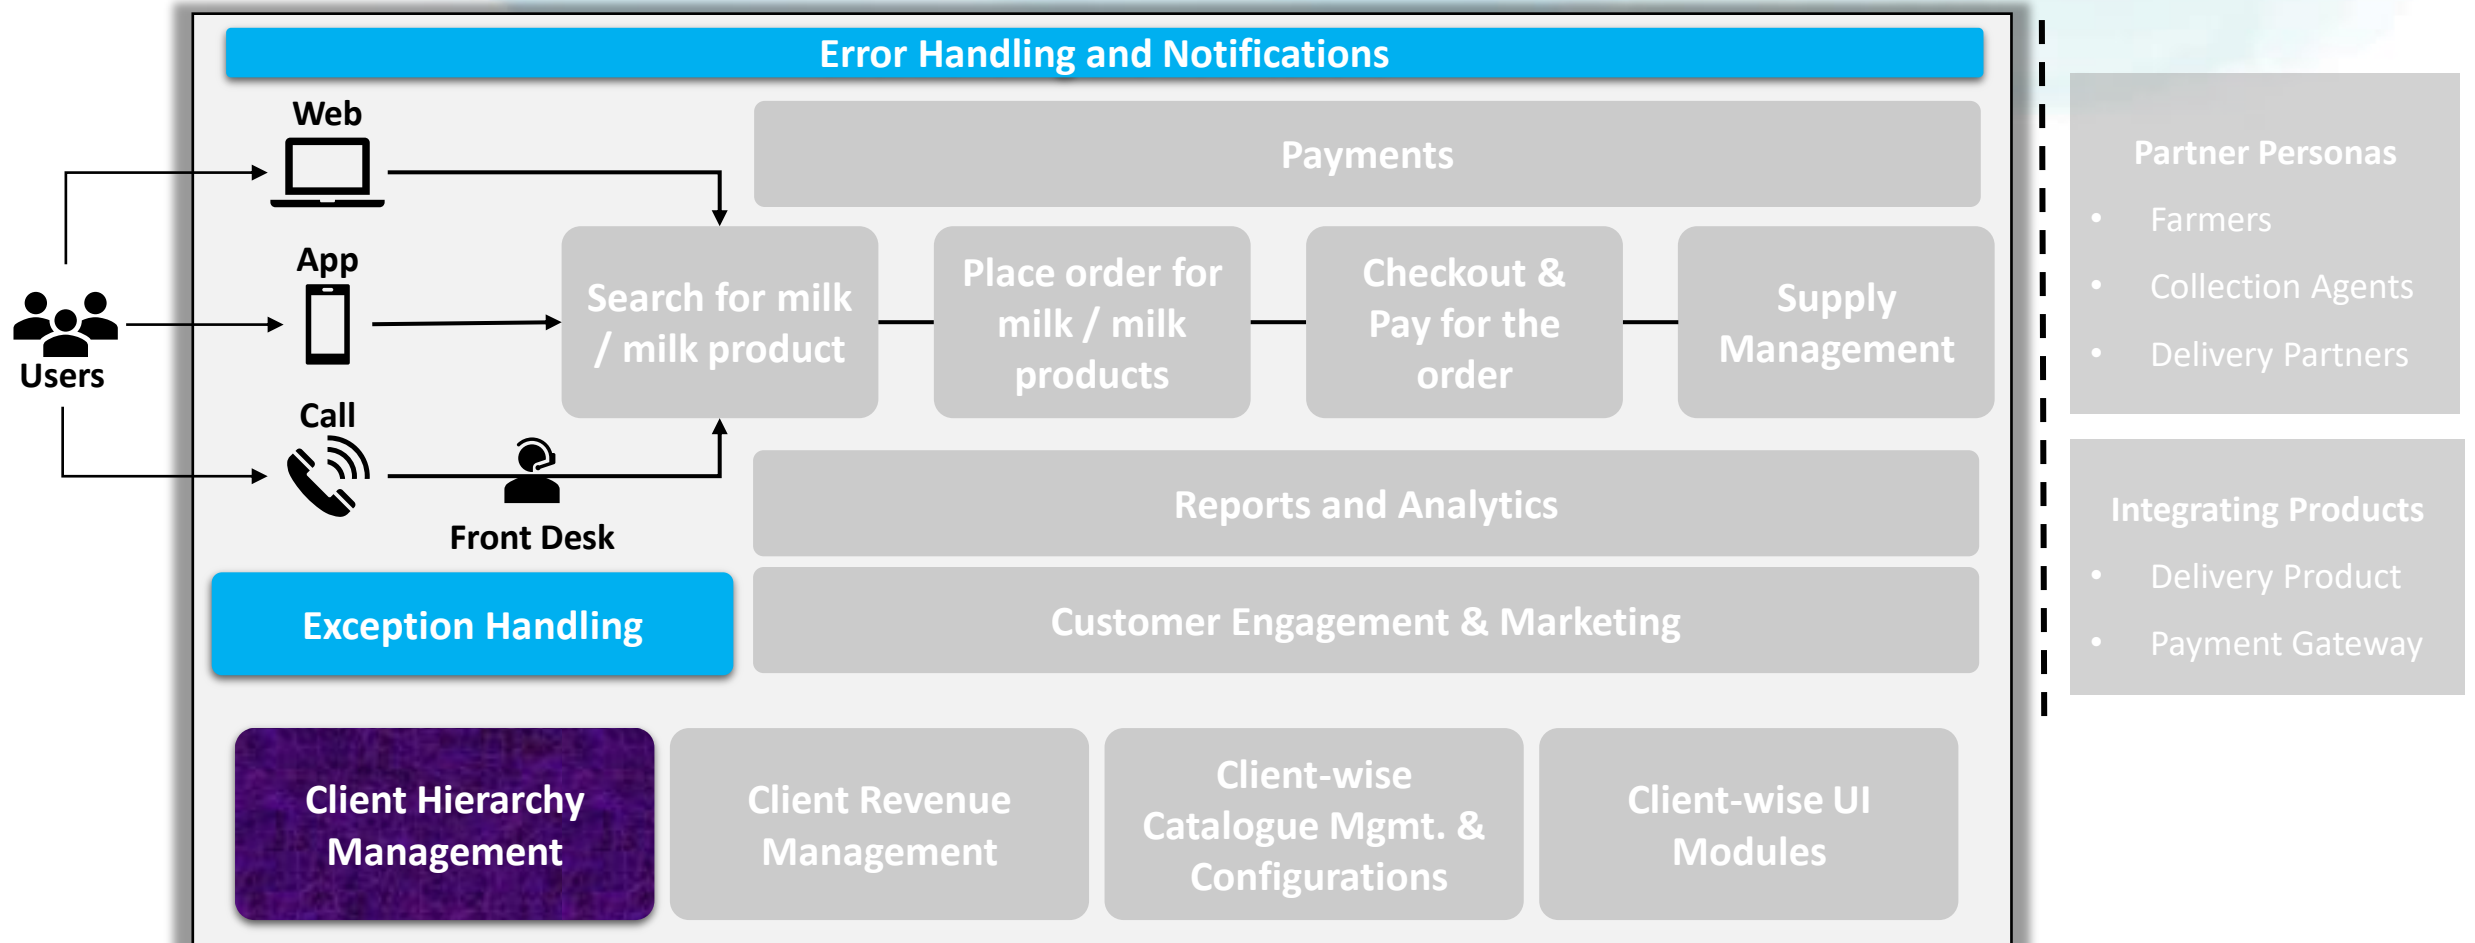

Storage Owner

- Keep an eye on demand vs supply charts
- Predict demand forecast based on models in the product

Admin

Update the demand vs supply models for master values

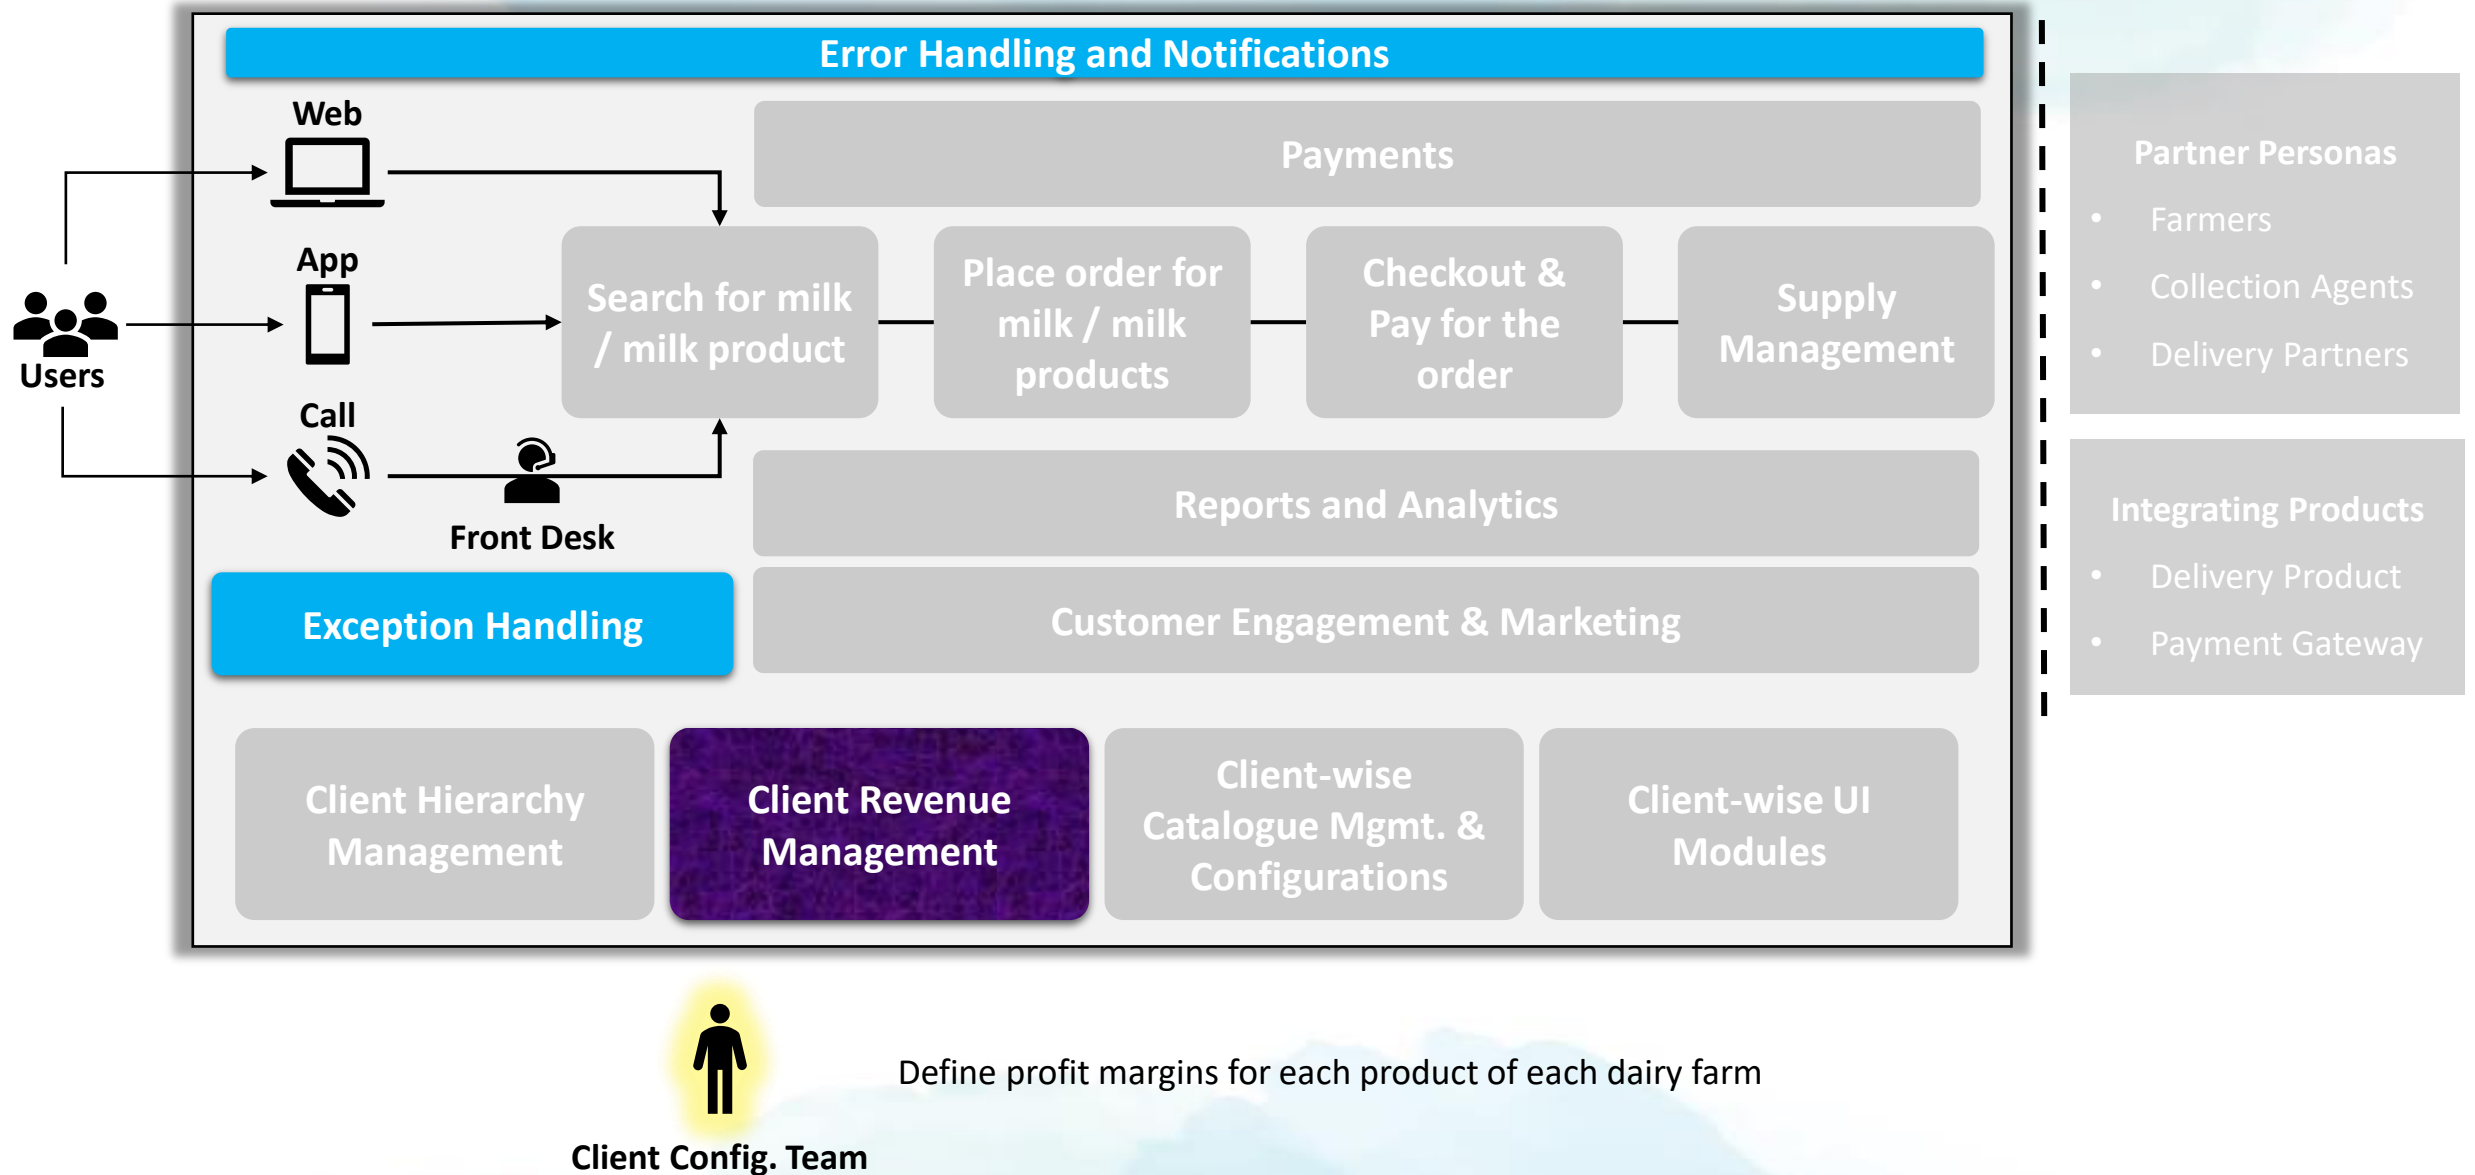

Technology Platform for any Dairy Farm

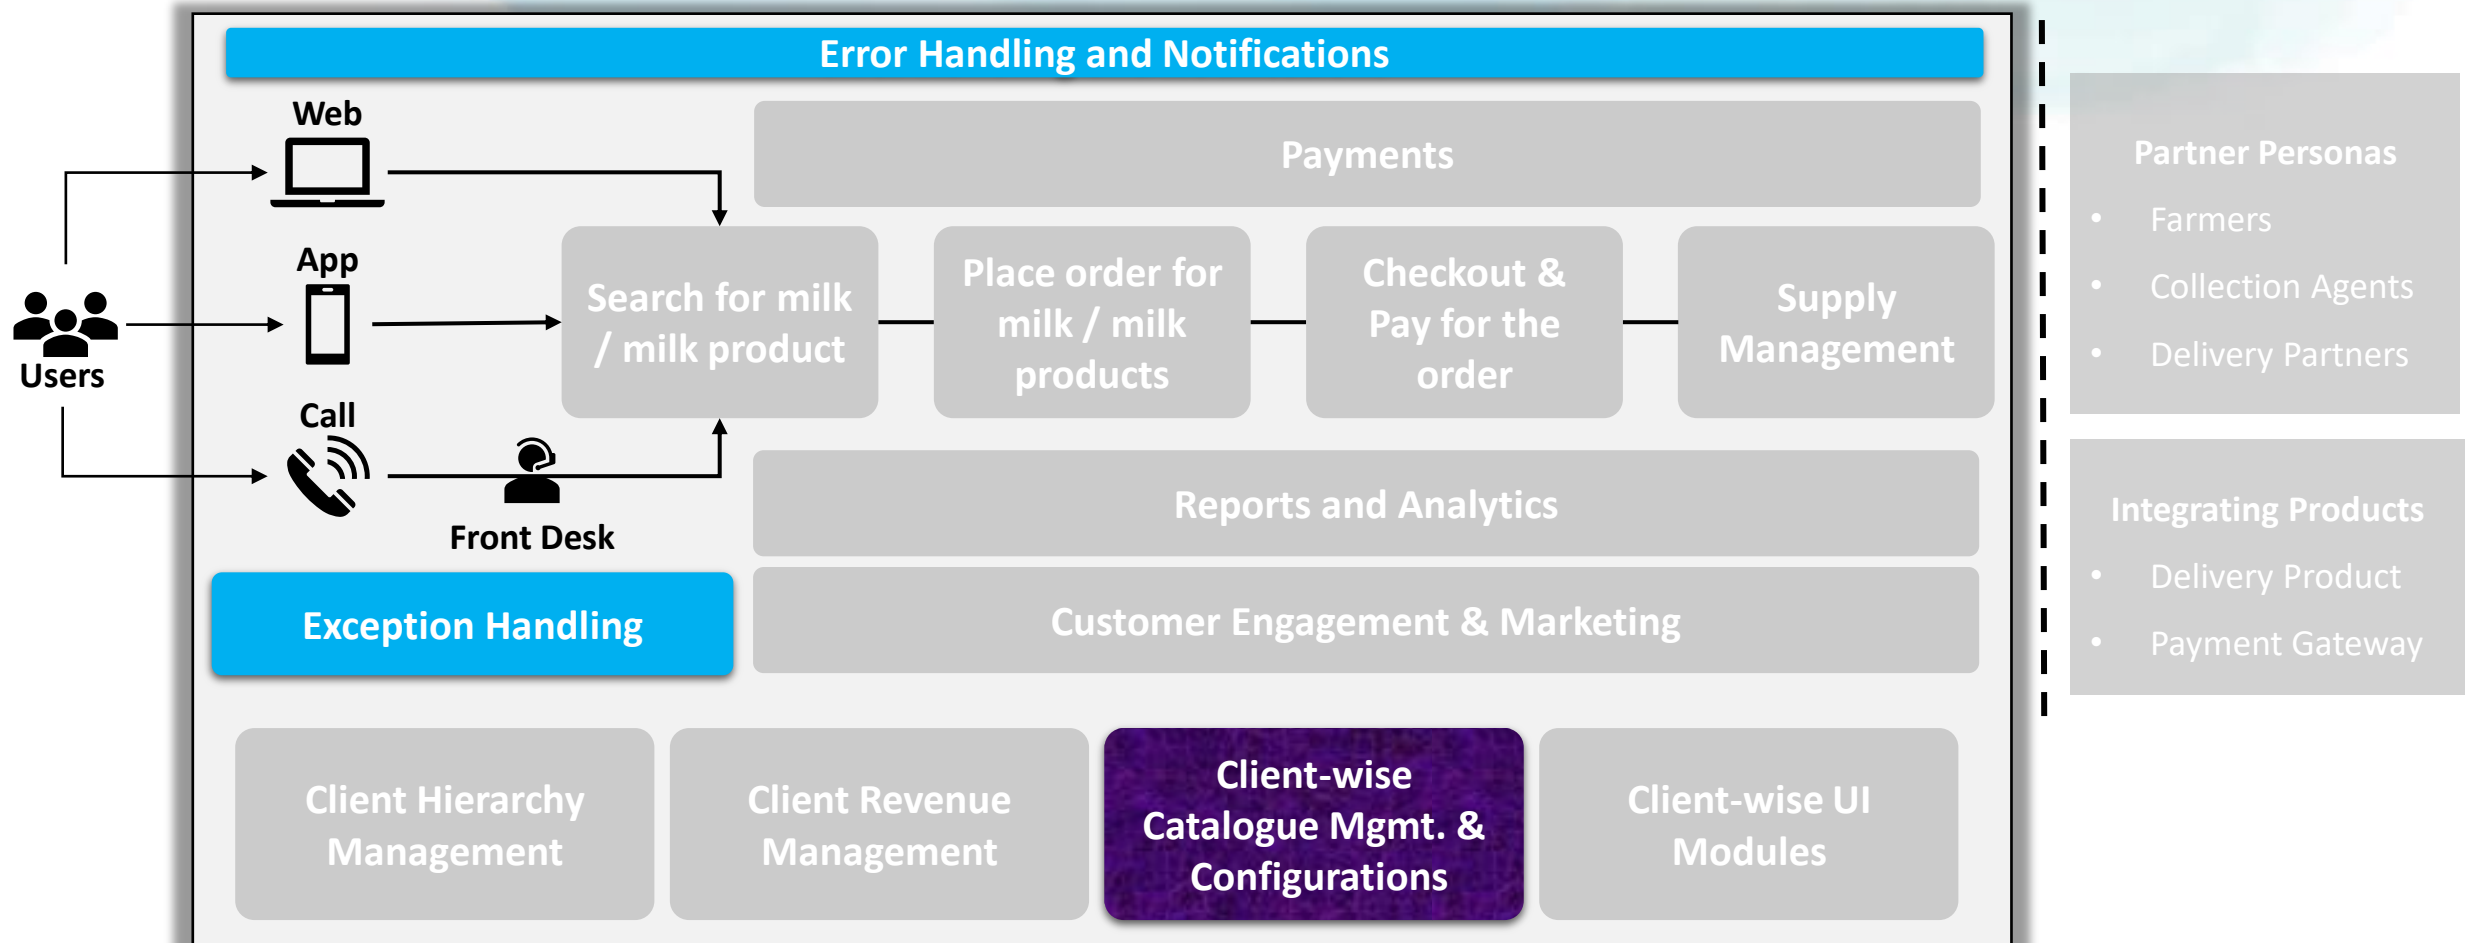

Client Config. Team

- Create clients, hence creating separate instance for each dairy farm
- Create user hierarchy for each dairy farm

Technology Platform for any Dairy Farm

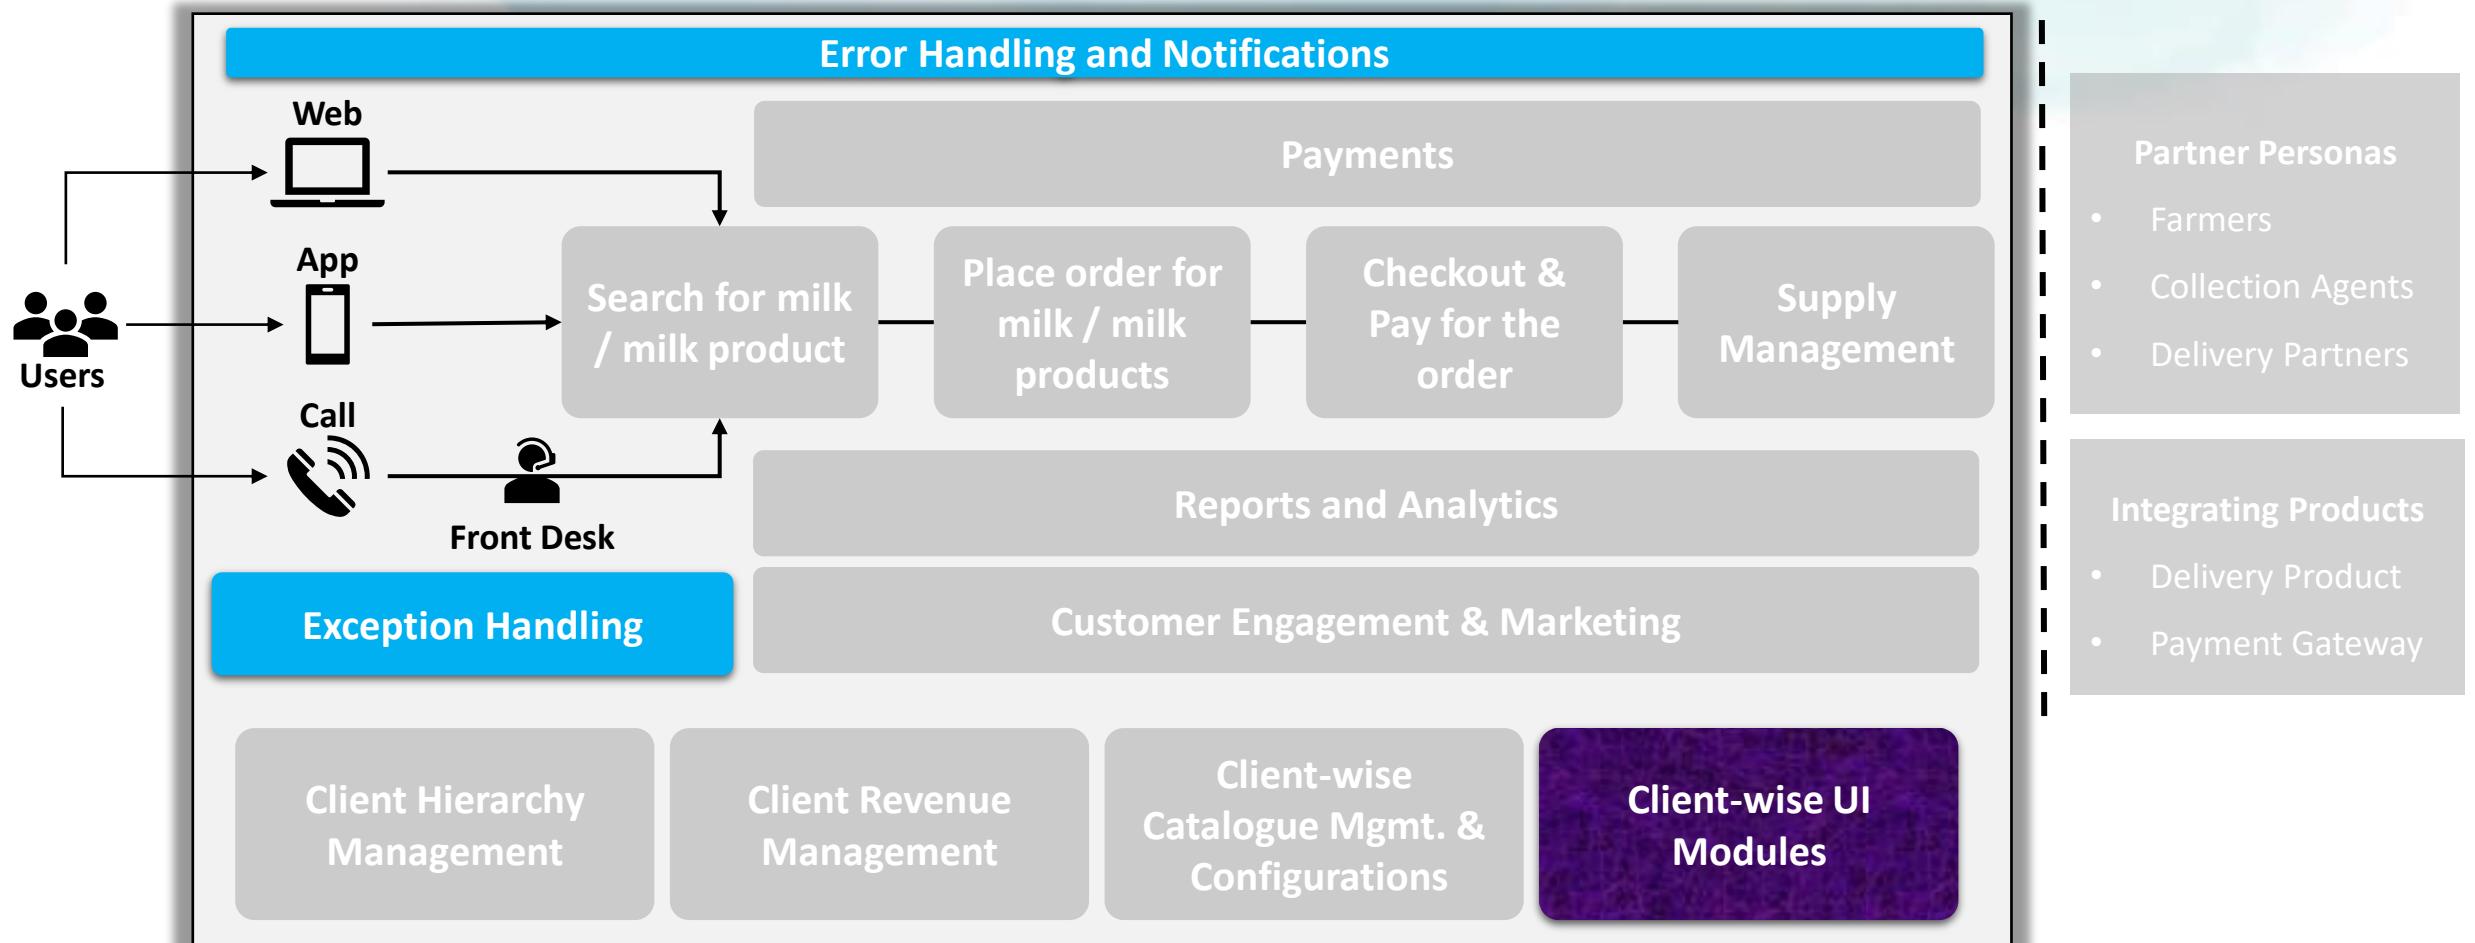

Technology Platform for any Dairy Farm

Client Config. Team

- Customize each instance of every dairy
- Define rules like min. units to be sold / bought
- Configure catalogue for each dairy

Technology Platform for any Dairy Farm

Client Config. Team

Customize user interface of every dairy

- Logo
- Color configurations
- Placement of UI components etc.

What are the Demand and Supply Variables for dairy industry?

Building blocks to build supply – demand model

Dependent Variables - Price

- Milk Price is dependent on:

- Farmer cost
 - Feed
 - Labour
 - Medicine cost
- Agent cost
- Fuel / Transport cost
- Storage cost (Chilling center)
- Processing cost
- Packaging cost
- Advertising cost

- Out of control Price Variables:

- Govt. policies
- Environmental factors

Dependent Variables - Supply

- Chilling center capacity
- Transportation abilities
- Processing units' capacity
- Productivity per animal
- Animal health
 - Vaccines
 - Availability of Veterinary Medicines
 - Cost of Veterinary Medicines
- Farmer's technical know-how
- Scarcity of fodder resources
- Credit
 - Availability
 - Ease of availing
- Number of animals
- Out of control Price Variables:
 - Govt. policies
 - Environmental factors

What are some other solutions?

Solutions outside Product Management purview

Solutions

- Ensure availability of quality fodder, medicines and vaccines for the cattle
- Strengthen the breed development programs
- Increase access to credit through dairy farmer organizations and other agencies
- Expand into new products like Powdered milk or various other types of cheese
- Export milk and milk products to relevant markets
- Train farmers and staff for clean and high-quality milk production
- Train front desk agents to take orders (training from professional call center trainers)
