

WhatsApp

Assignment #3: New Feature Recommendation

Agenda

Why?

What?

How?

Why do we need this idea?

- Idea brief – Problem, Solution, Benefits & Application

← What is the idea in brief?

Idea –

- How can we manage '**groups within groups**' under WhatsApp?
- How can we moderate these groups effectively? ✓✓

Solution –

- Group-subgroup structure WhatsApp chats
- Additional role in WhatsApp (Moderator and Admin) ✓✓

Benefits –

- Structured user experience under groups
- Distributed authority for better group management ✓✓

Probable Application –

- Efficient customer engagement based on various segments, products or regions
- Easy group management for admins of school, alumni, fans or family groups ✓✓

Agenda

Why?

What?

How?

Why do we want to implement this idea?

- What are the market trends?
- What are the user trends?
- What is the market size?
- Is it aligned with our Vision and Strategy?
- Where do we stand against best in class?

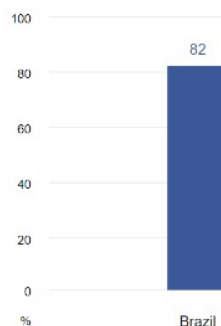

What are the market trends?

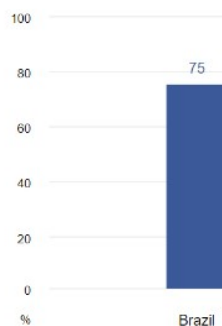

- High percentage of customers prefer to message businesses instead of calling*
- Hence managing these communications through groups & sub-groups can help businesses to sustain and grow

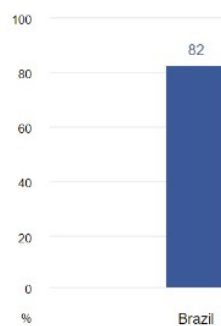

Among people surveyed across 4 markets who message businesses, over 68% expect messaging experiences.

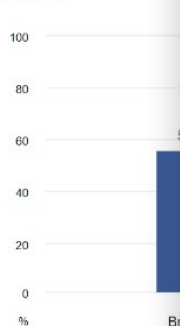

Among people surveyed across 4 markets who message businesses, over 59% expect to use messaging for purchases in the future.

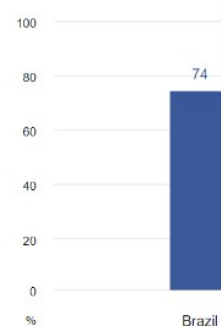

Among people surveyed across 4 markets who message businesses, over 70% expect to message businesses for customer service questions in the future.

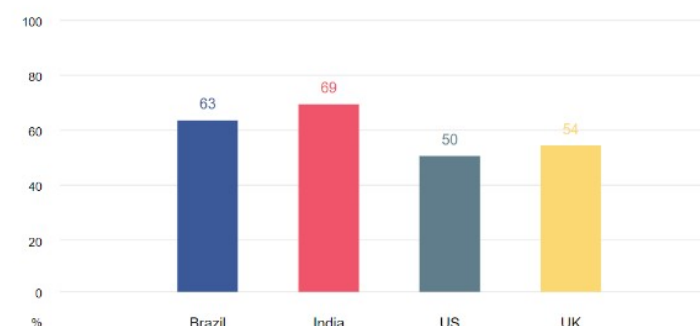

Among people surveyed across 4 markets who message businesses, over 49% say that compared to more traditional channels, messaging businesses offers them better advice and care.

Among people surveyed across 4 markets who message businesses, over 59% say that compared to more traditional channels, messaging businesses offers them better advice and care.

Among people surveyed across 4 markets who message businesses, over 50% say that compared to more traditional channels, messaging businesses offers them better advice and care.

facebook IQ

What are the user trends?

Future workforce favors communication through Instant Messages and prefers persistent chat*

Generational Preferences at Work

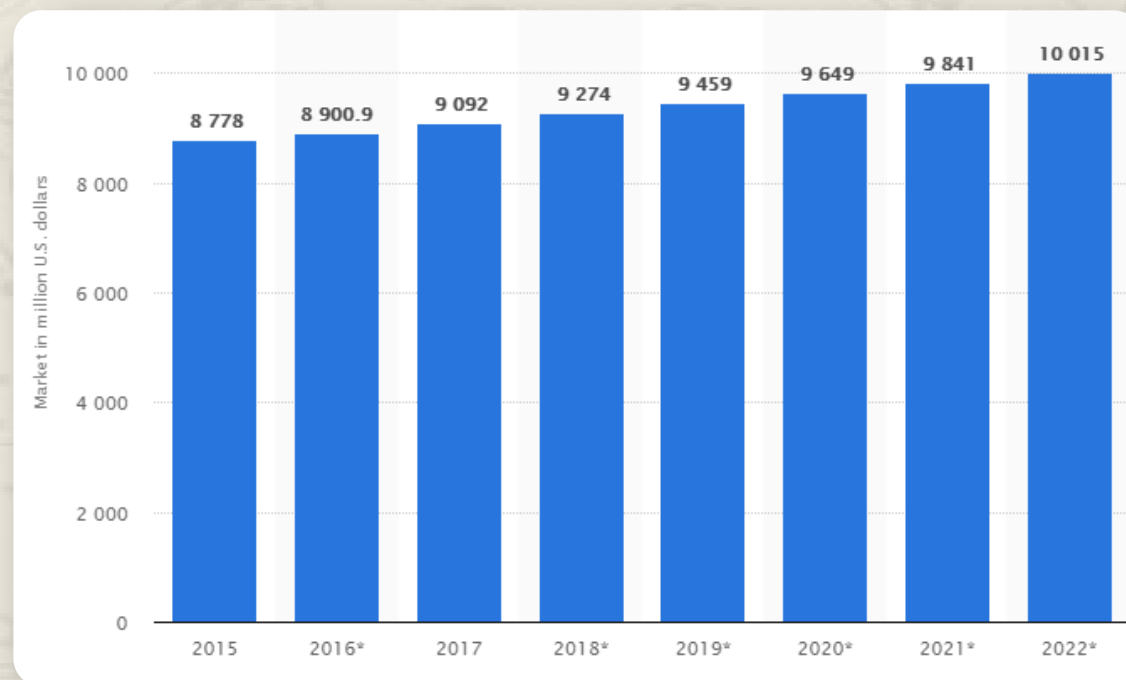

For organizations with a multi-generation workforce, it is important to understand your demographics to know how to best find the balance of tools across the generations. If you are an organization that heavily relies on email, what are you doing for your new workers? Are you giving them the tools they need to be effective?

← What is the market size?

- Also, the market size is huge and getting a piece of market is lucrative in terms of financial gains

Here is the size of communication software/application market
(forecasted as approx. \$ 9,649 million in 2020)*

← Is it aligned with our Vision and Strategy?

Vision Alignment with new feature recommendation:

“Behind every product decision is our desire to let people communicate anywhere in the world without barriers.”*

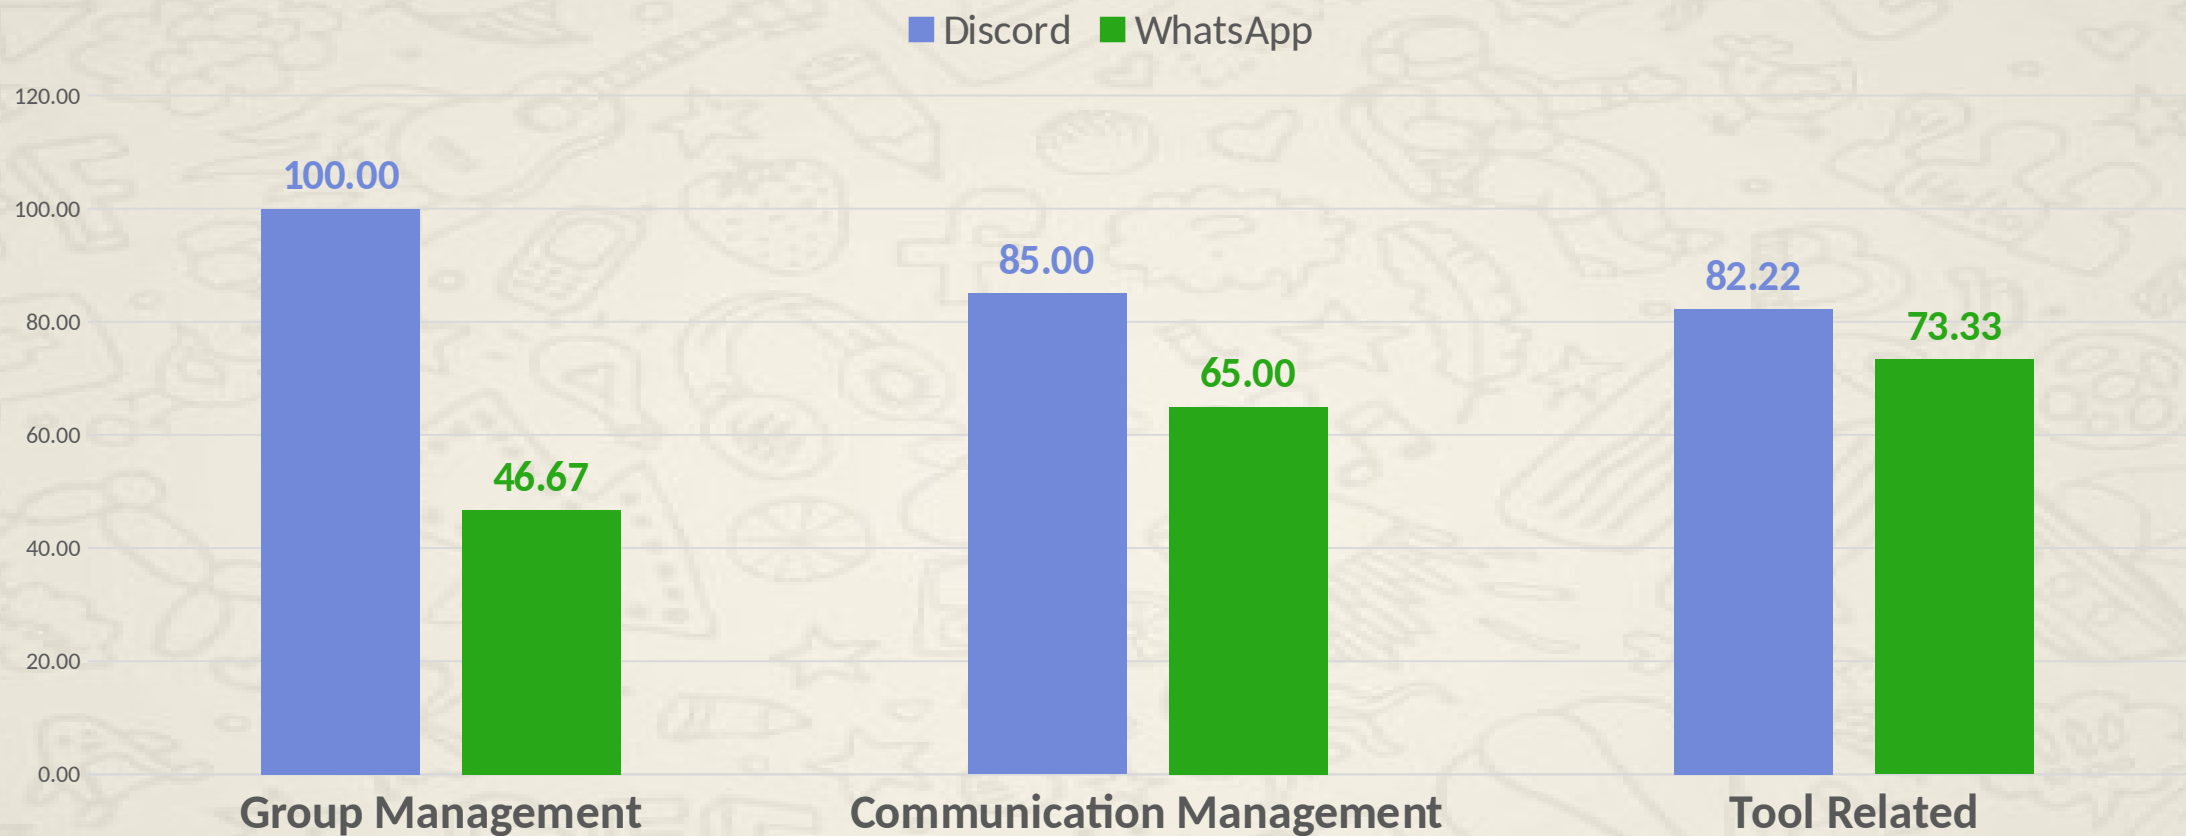

Strategy Alignment as per Product Lifecycle

- WhatsApp is in maturity stage of product lifecycle
- Hence WhatsApp needs to revive growth by entering new markets and bundling products

Where do we stand against best in class?

Discord is the best in class free chat app* which is mostly used by gamers. Here is my own comparison of these two apps

Agenda

Why?

What?

How?

What needs to be done to implement this idea?

- Who would be external users for this feature?
- What do personas want to achieve?

Who would be external users for this feature?

Here are the personas for this feature...

- Owns a small business
- Has a single product Z which is sold across geographies
- Has multiple regional heads handling respective regions

Wants regional heads to address region-wise complaints which are raised through messages

John

- Is a program manager
- Manages multiple project across multiple geographies
- Each team has a project manager
- Each team has a team leader

Wants each PM to take care of team communication within geography & coordinator to take care of communication within the project

Chad

- Is an alumni communication head in MBA college
- Has alumni for multiple batches (years) for multiple specializations (MBA Marketing, MBA HR and MBA Finance)

Want to assign batch & specialization wise coordinators (to add users) and moderators (to moderate communication)

Susan

These users / 'Personas' can be described by...

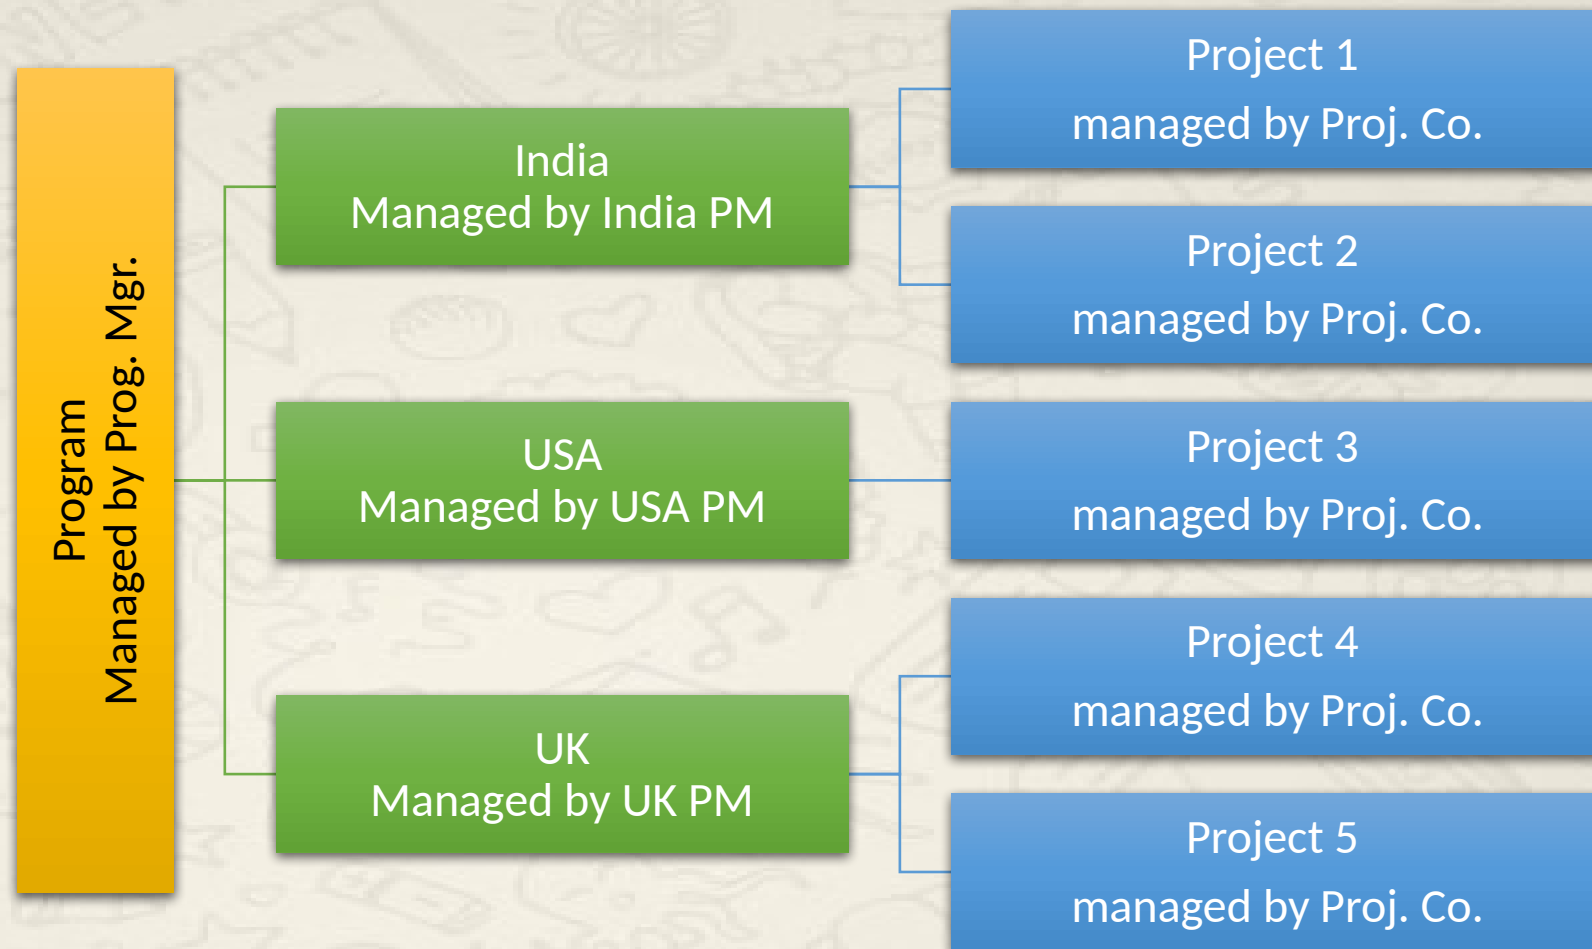

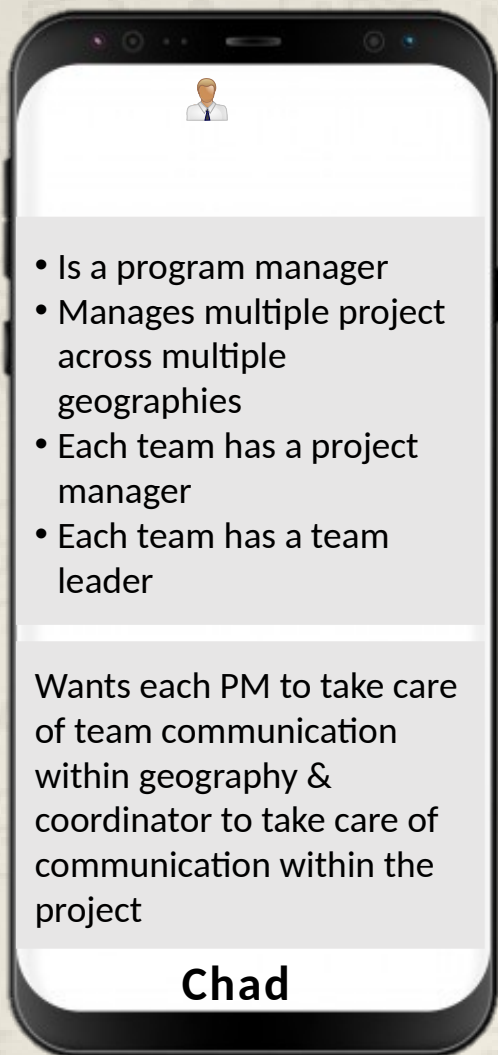

Details about the persona i.e. relevant characteristics & behavior

Goals of the persona i.e. what problem the persona wants to solve

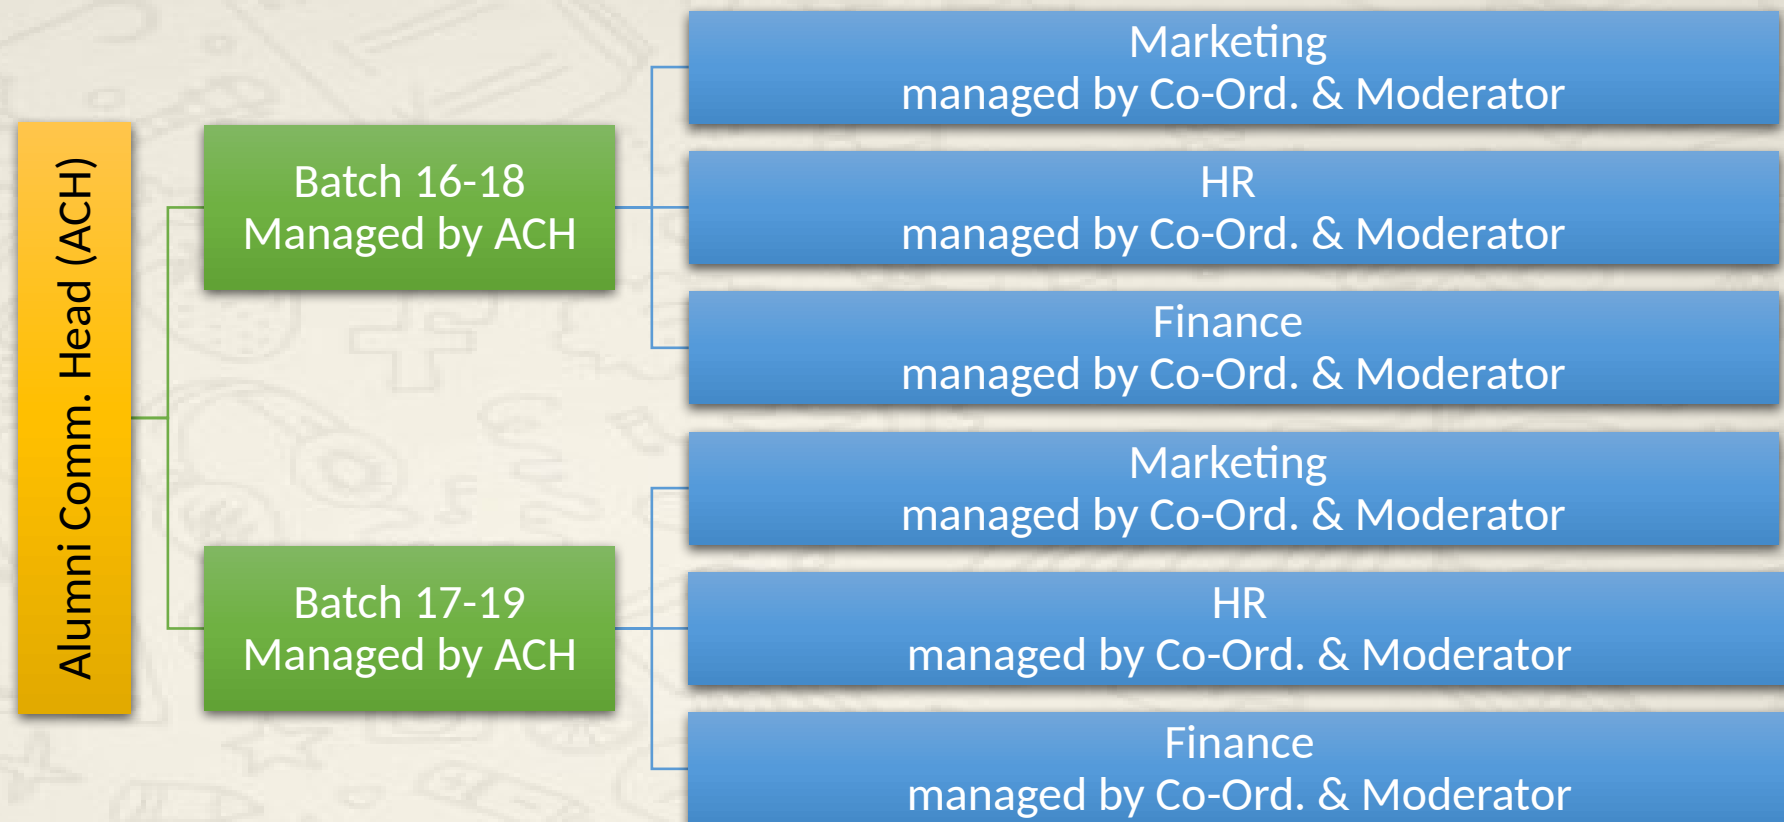

What do personas want to achieve?

← What do personas want to achieve?

What do personas want to achieve?

Agenda

Why?

What?

How?

How can we implement this idea?

- What is the feature break down?
- How will it look?
- What is the roadmap for release?
- What would be the details of user stories?

← What is the feature break down?

Two level tree structure (group & sub-group)

Create group

Create sub-group under group

Edit group information structure

Edit sub-group information

Delete group

Delete sub-group

View group & sub-group structure

New role for group management

Assign moderator role to members

Revoke moderator role

Additional role-wise actions

Ban group member temporarily (for 24 hours)

Ban group member permanently

Pin important messages to group chat

Allow messaging in group chat

Legend:

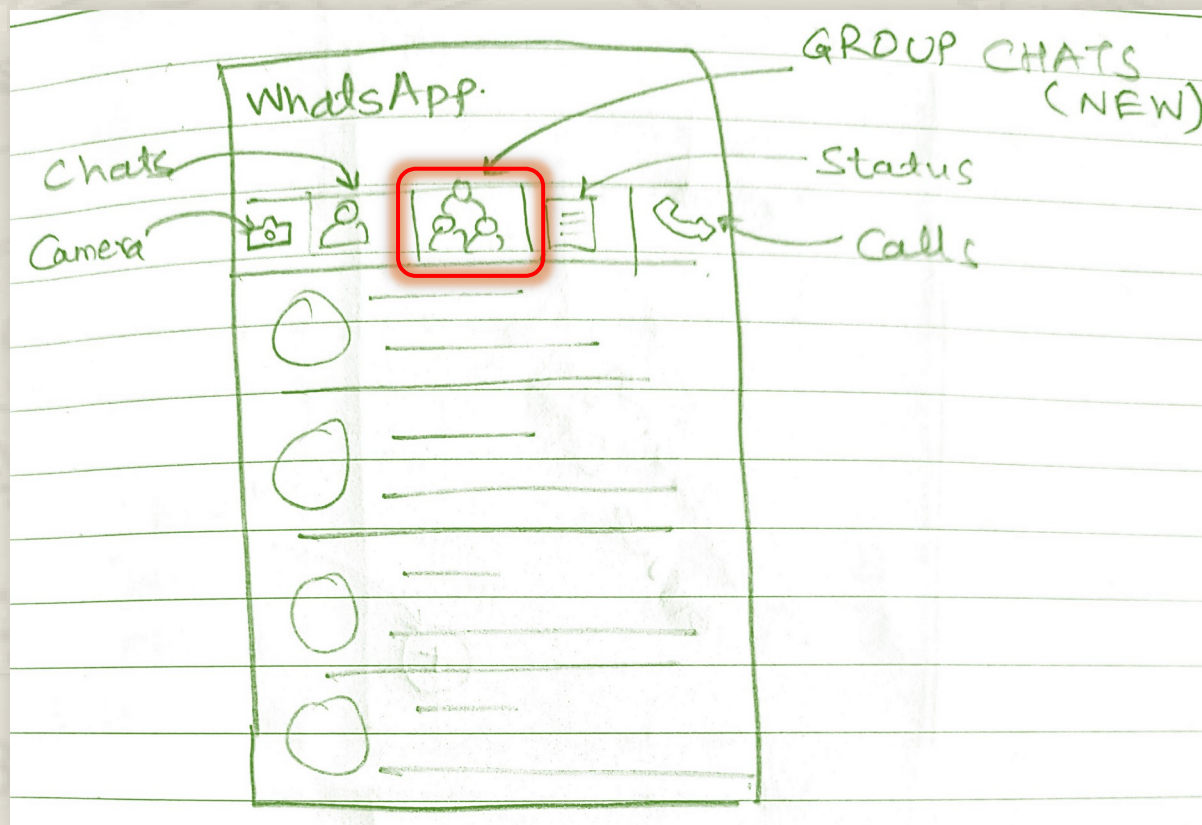

Epic

User Story

← How will it look?

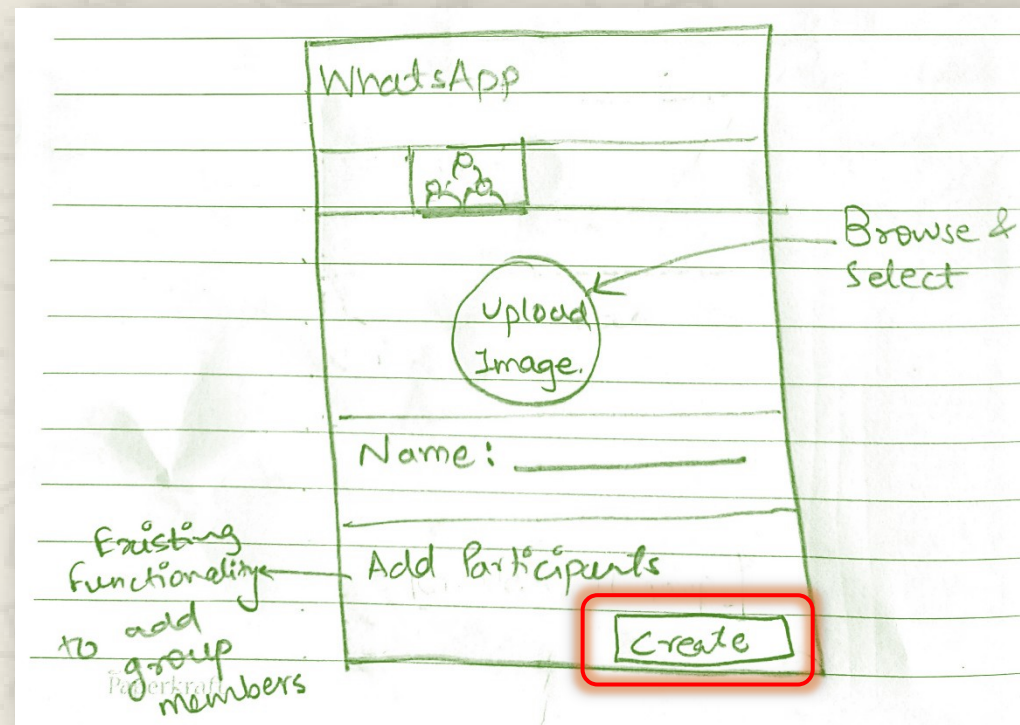

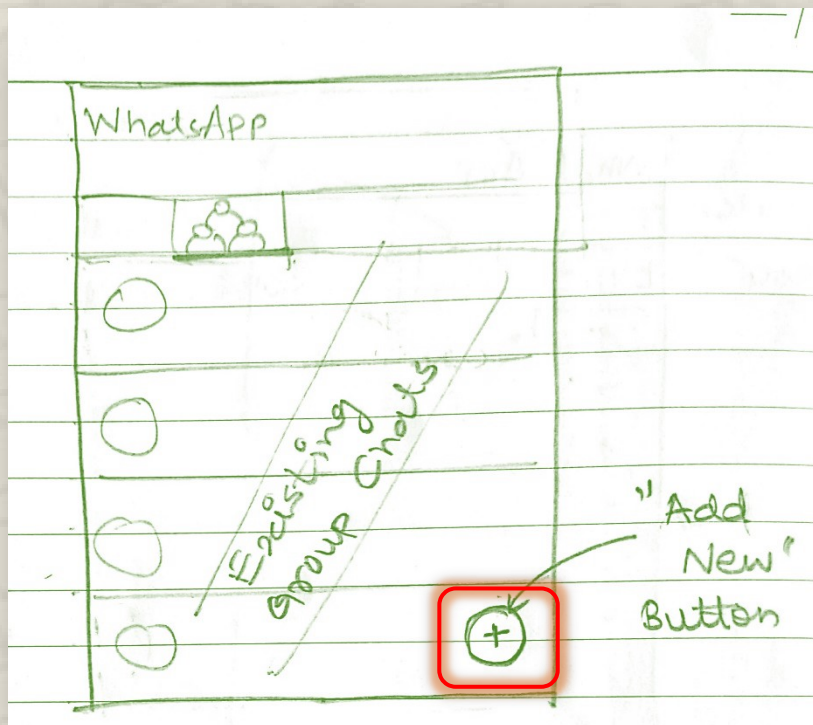

Where will the new group chat section be displayed?

← How will it look?

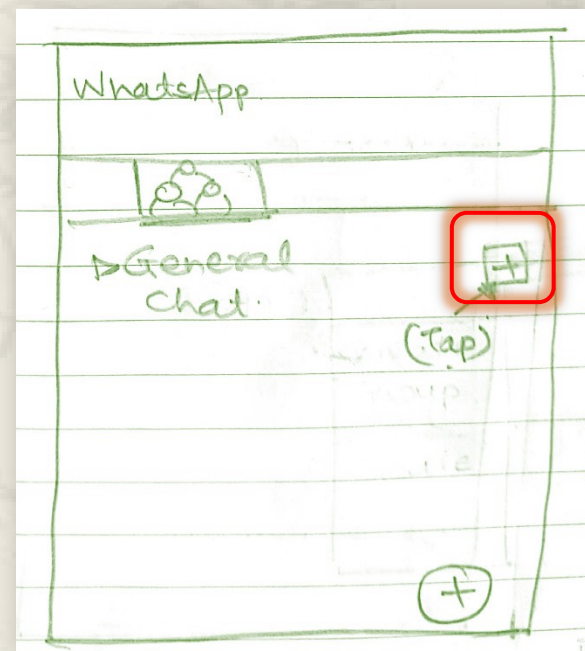

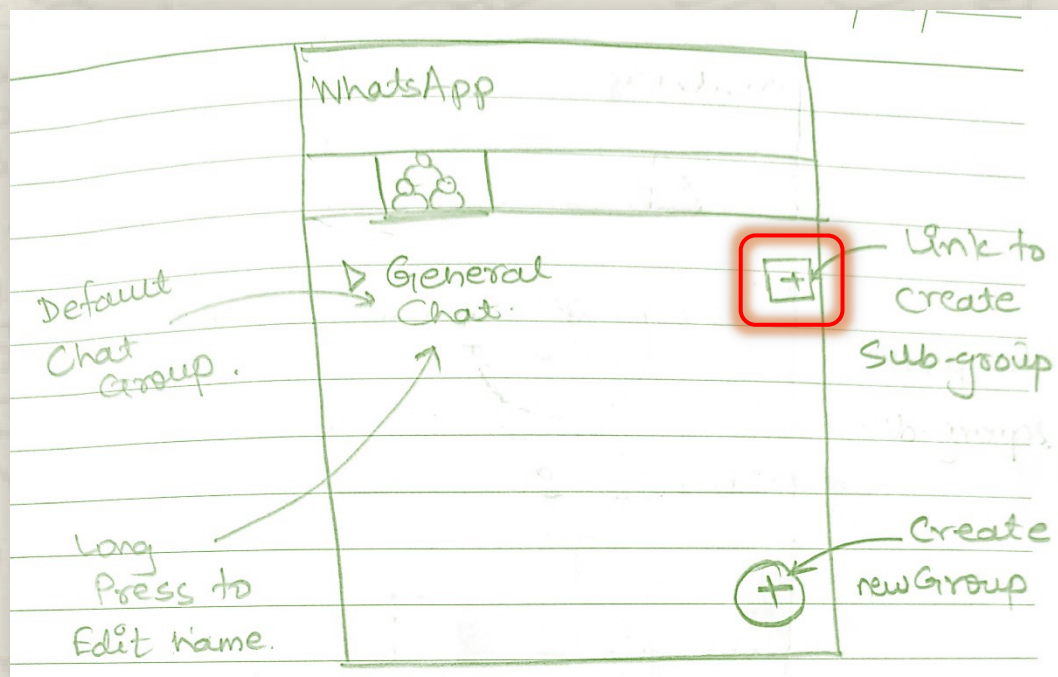

How can one add new group and sub-group?

← How will it look?

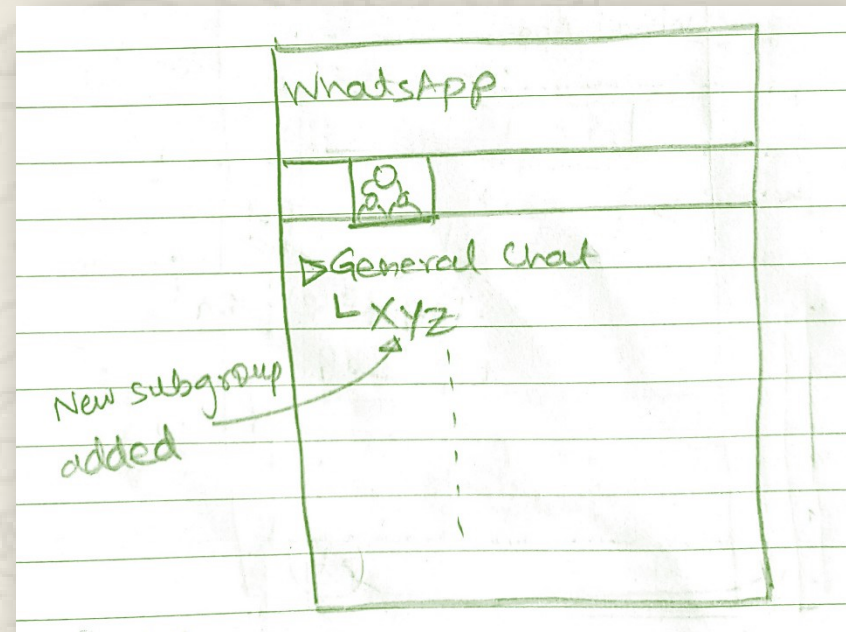

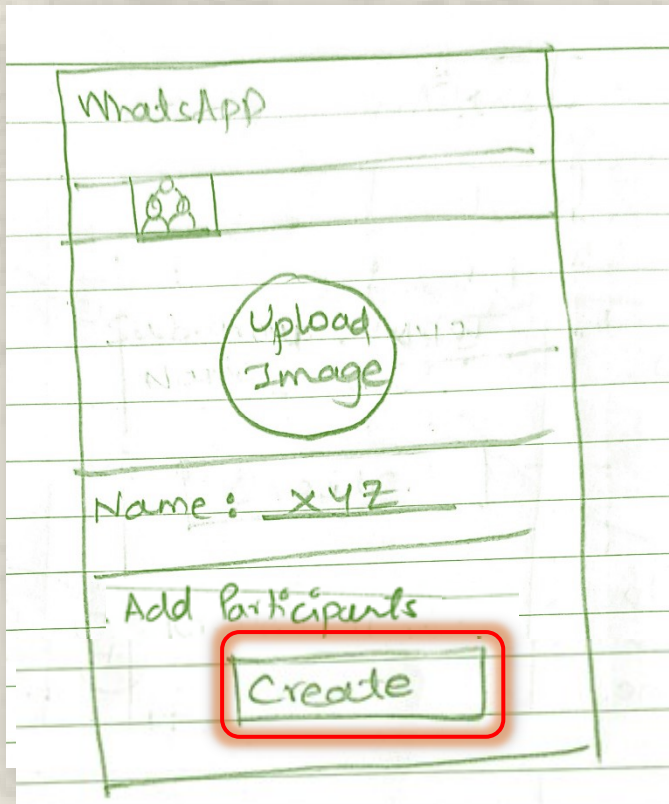

How can one add new group and sub-group?

← How will it look?

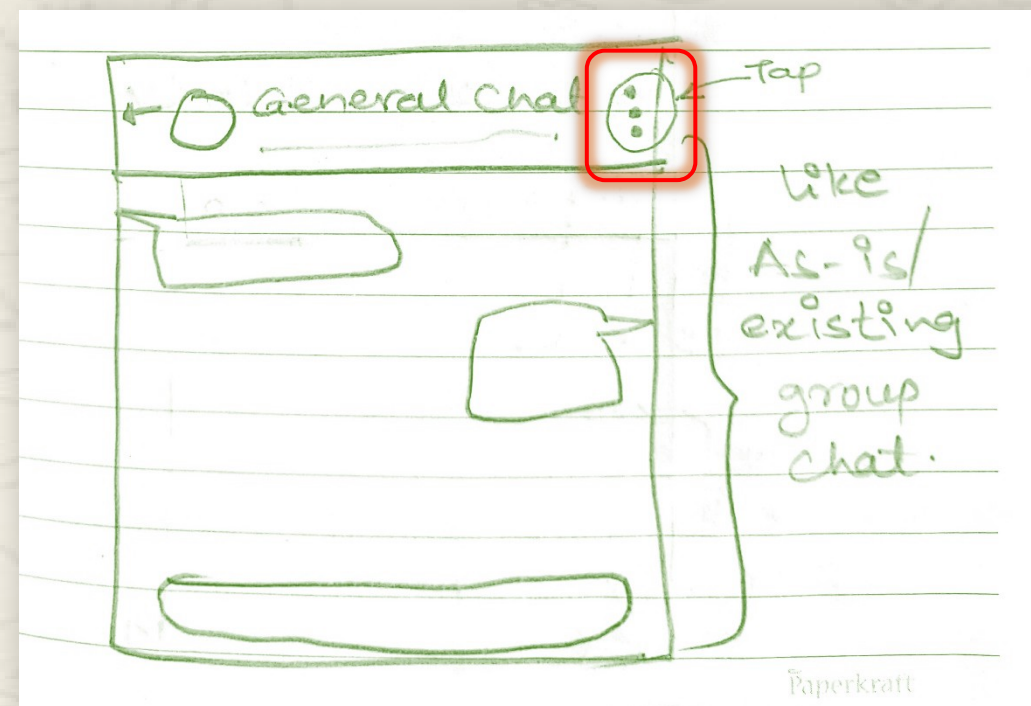

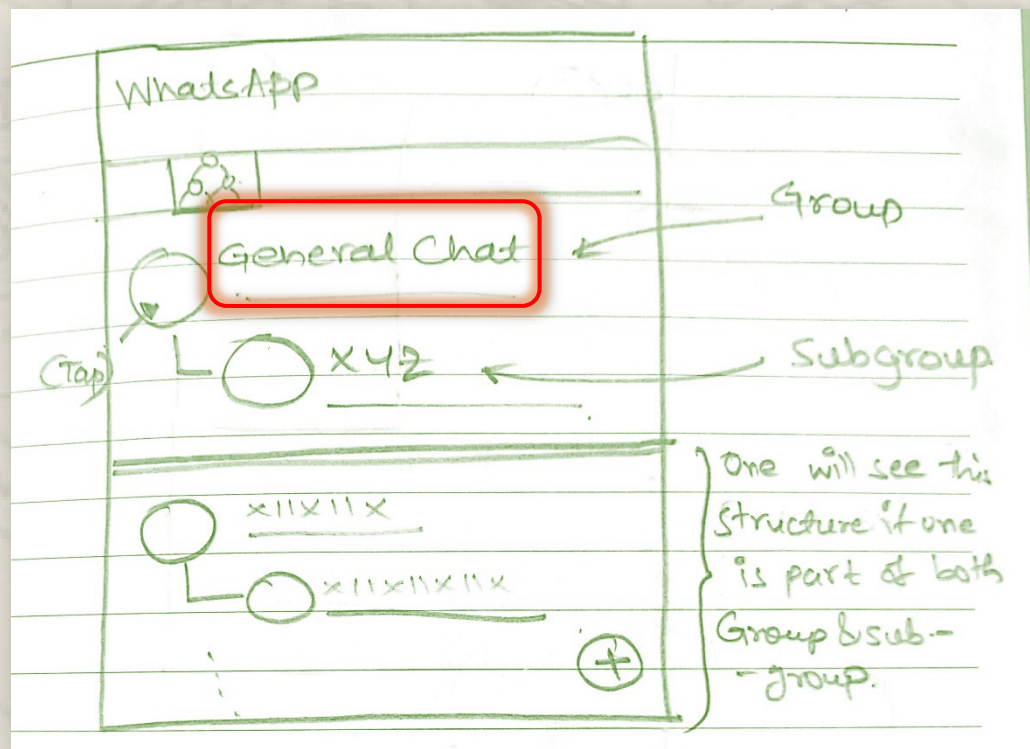

How can one add new group and sub-group? ✓✓

← How will it look?

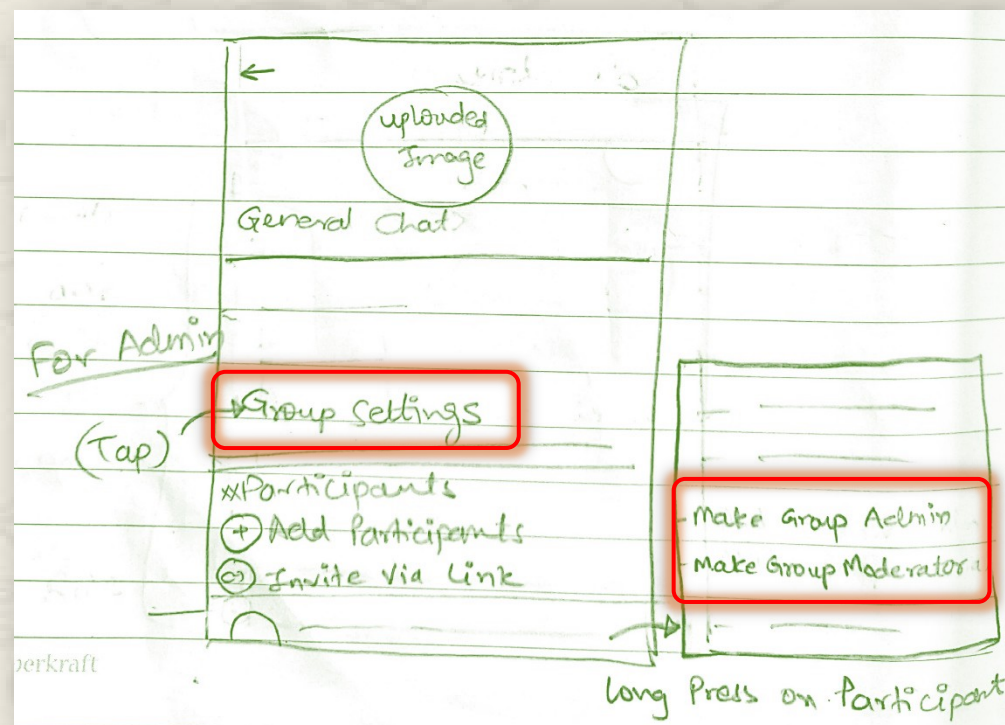

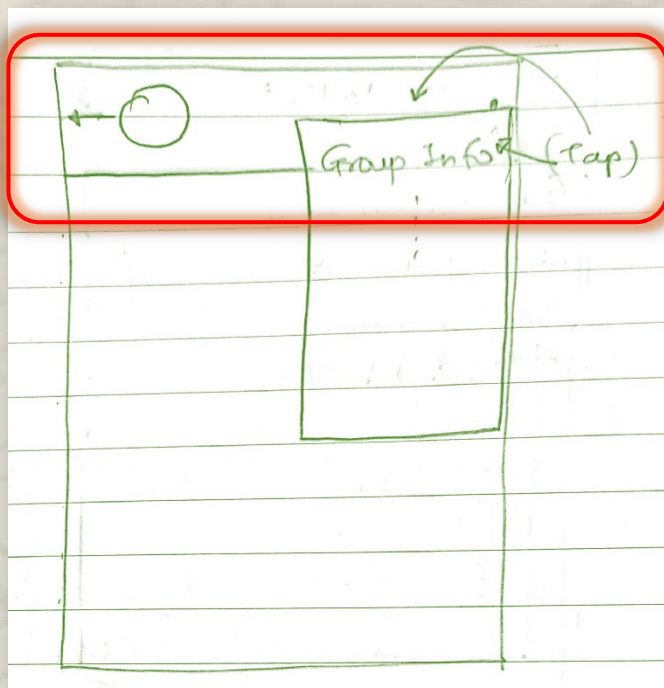

How can one get into group settings? ✓✓

← How will it look?

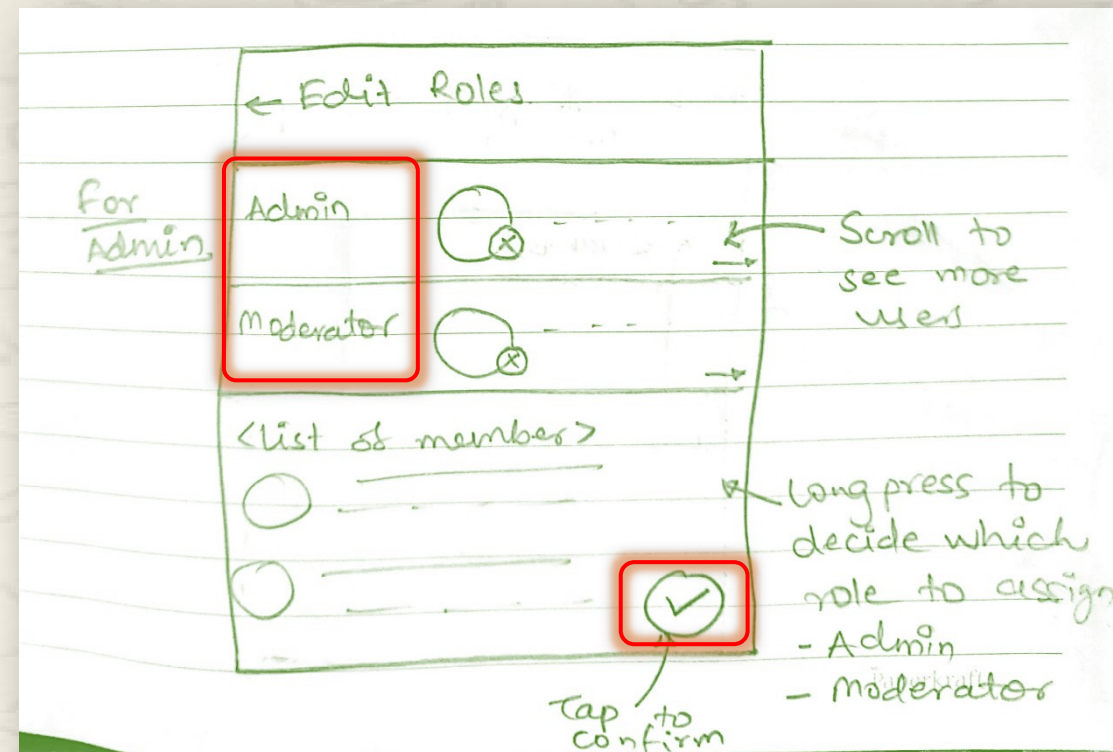

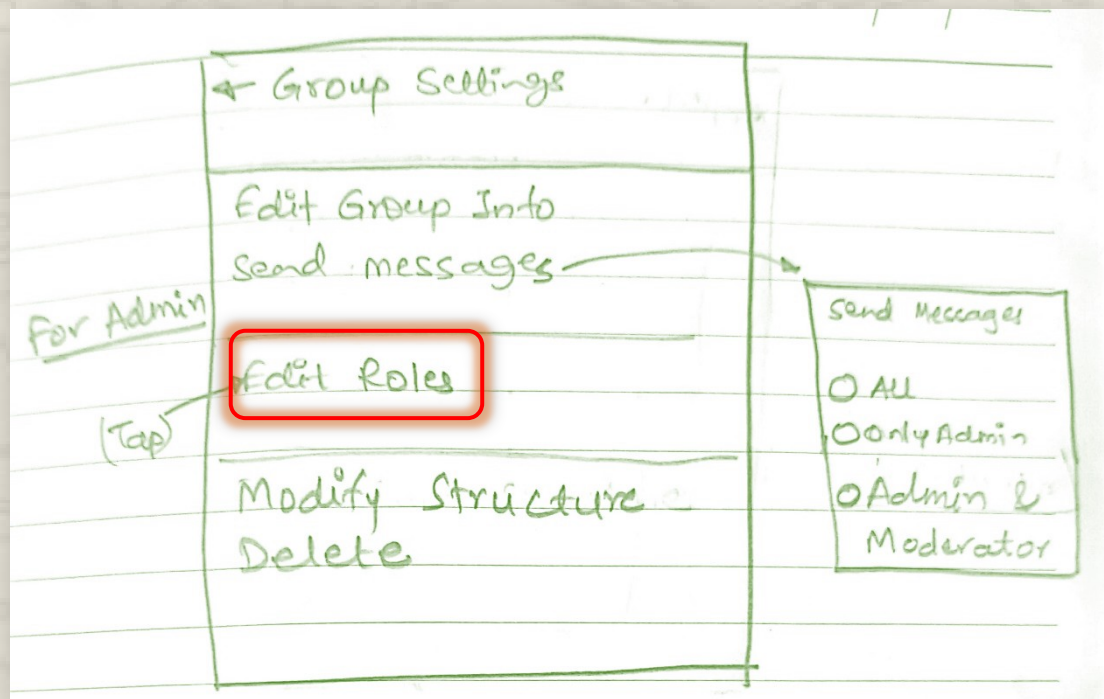

How can one get into group settings? ✓✓

← How will it look?

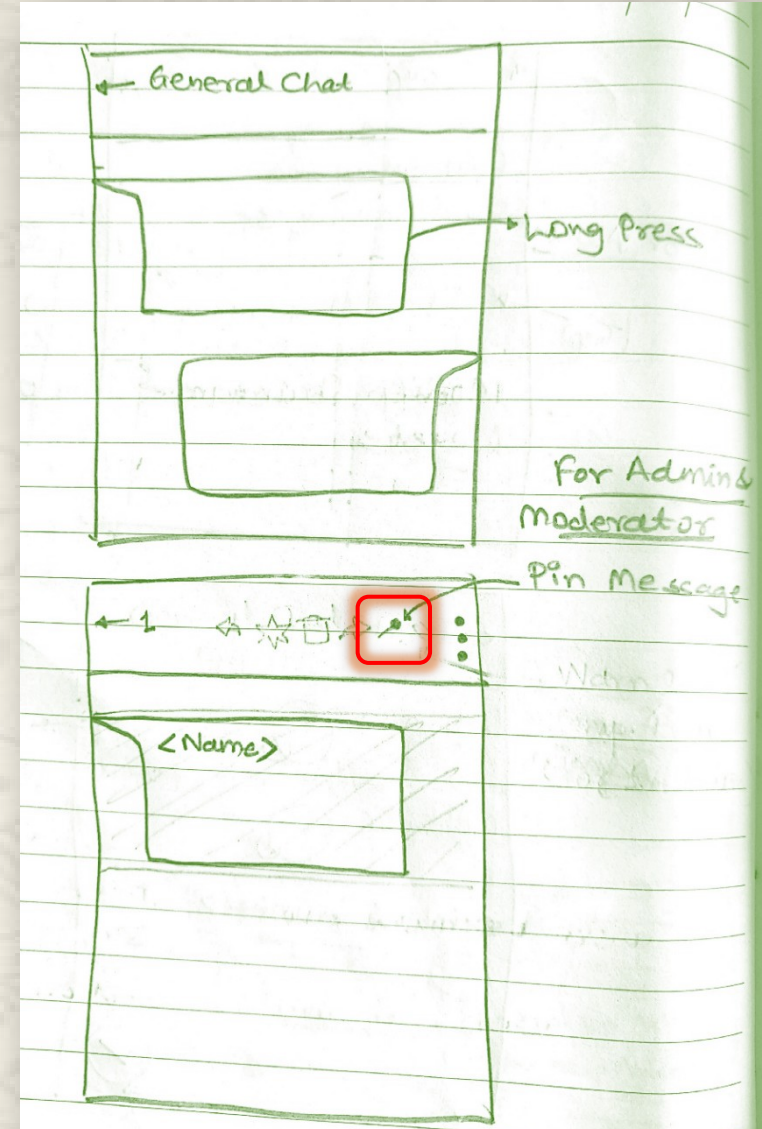

How can one assign roles?

← How will it look?

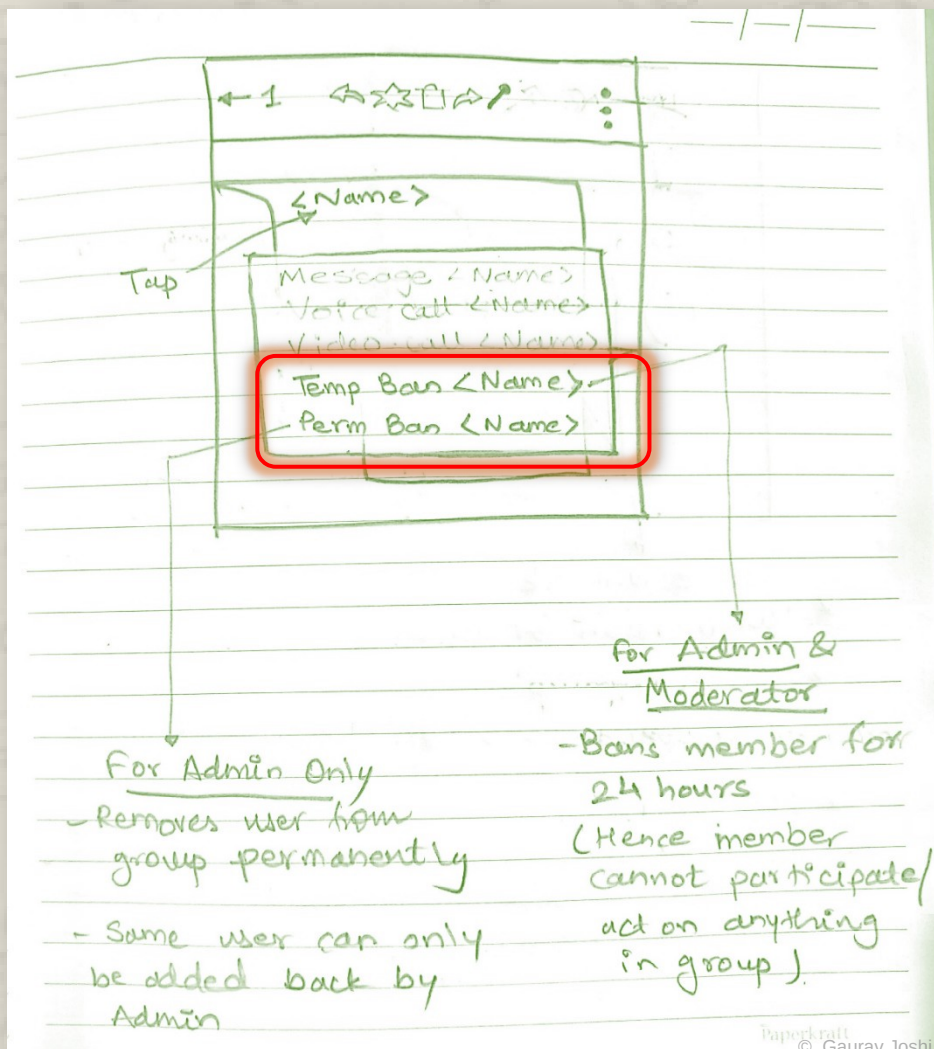

How can Admin and Moderator can pin important messages?

← How will it look?

How can Admin and Moderator can take actions? ✓✓

Admin & Moderator:

- Can ban member for 24 hours
 - So that this member won't be able to participate in group chat
- ✓✓

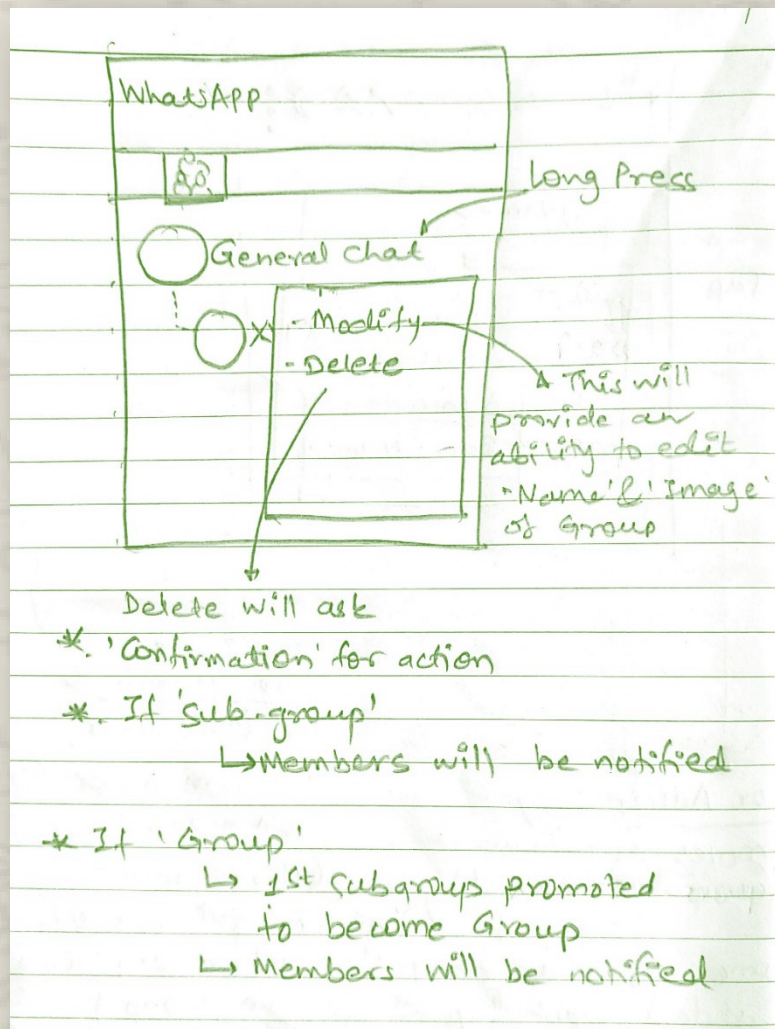

Admin:

- Can permanently ban member
 - Once banned permanently, the same member can only be added back by Admin
- ✓✓

← How will it look?

How can Admin and Moderator can take actions? ✓✓

Admin:

- Can edit the group and sub-group
- Deletion of group will promote the first sub-group as a group
- Members will be notified once the group is deleted
- Deletion will prompt for confirmation message ✓✓

← How will it look?

What are the differences between Admin and Moderator actions?

	Pin Messages	Temporary ban (24 hours)	Permanent ban
Admin	Yes	Yes	Yes
Moderator	Yes	Yes	No
Member	No	No	No

What is the roadmap for release?

Two level tree structure (group & sub-group)

Create group

Create sub-group under group

Edit group information structure

Edit sub-group information

Delete group

Delete sub-group

View group & sub-group structure

New role for group management

Assign moderator role to members

Revoke moderator role

Additional role-wise actions

Ban group member temporarily (for 24 hours)

Ban group member permanently

Pin important messages to group chat

Allow messaging in group chat

Product Backlog

chat

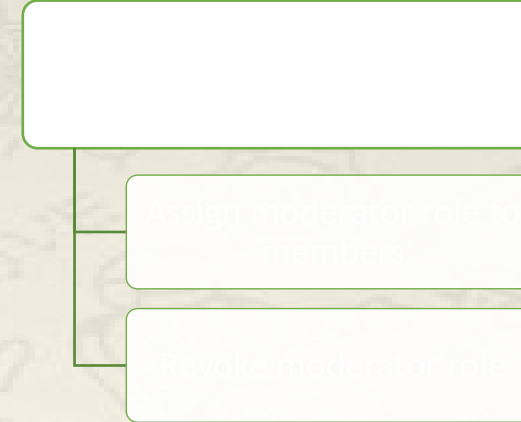

What is the roadmap for release?

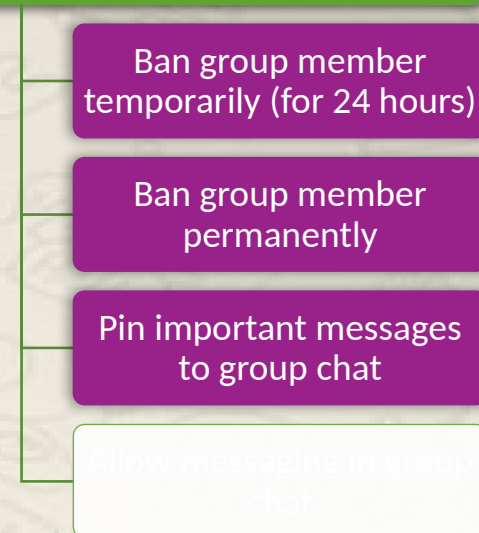

What is the roadmap for release?

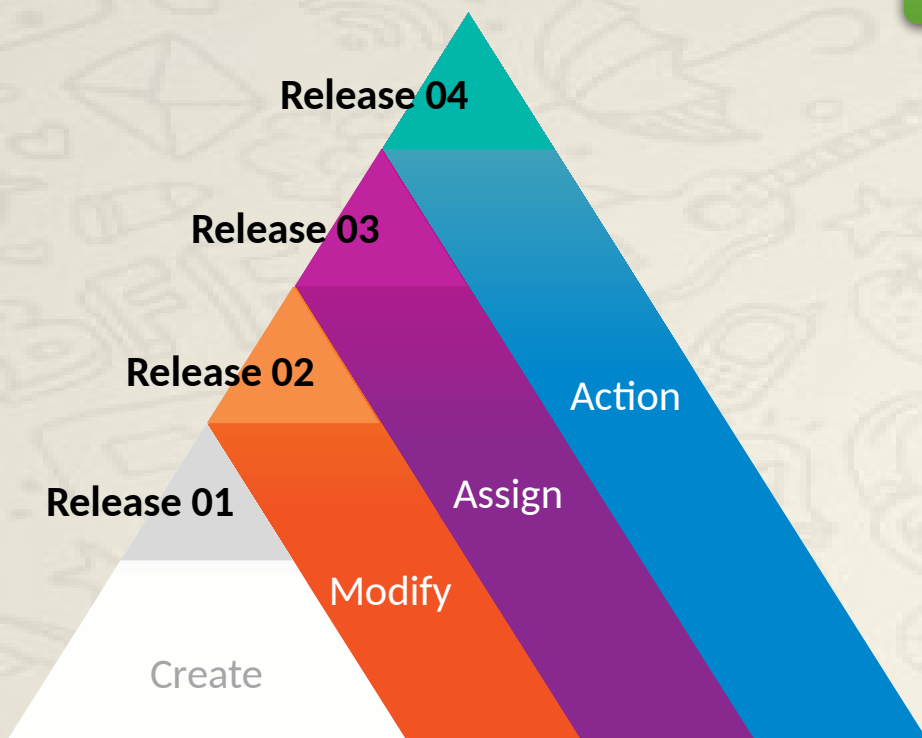

Two level tree structure (group & sub-group)

Additional role-wise actions

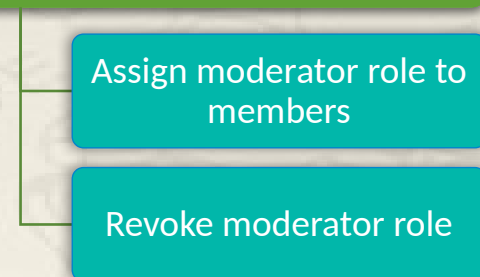

What is the roadmap for release?

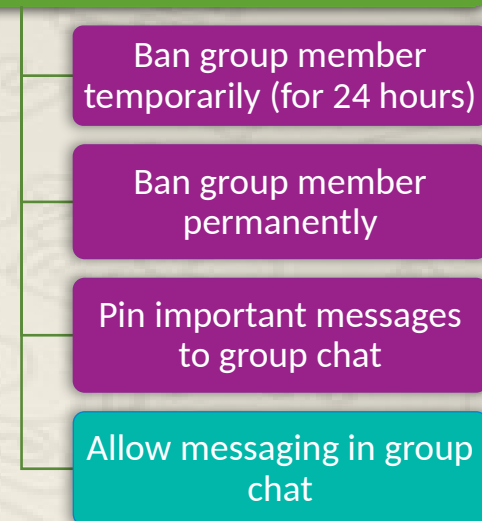

Two level tree structure (group & sub-group)

New role for group management

Additional role-wise actions

- **User Story:** Create sub-group under group
 - As an Admin
 - I want to create sub-groups within groups
 - So that I am able to distribute members under relevant clusters
- Given
 - I am logged in
 - And I have created a group already under Group chat section
- When
 - I click on link to create sub-group button
- Then
 - I am able to upload image for sub-group display picture
 - And I am able to assign name to the sub-group
 - And I am able to add participants to the sub-group

Agenda

Why?

What?

How?

How can we bring this idea to life?

- What is the Go-to-market Strategy?
- What are the success factors?
- How can personas use this feature?

← What is the go-to-market Strategy?

Here is how you can sell this feature

Target Group	Pain Points	Product Value	Marketing Message
• Small Businesses CEO's • Social Media Managers • Project Managers • Group Admins	• Sending important message again and again in the group chat • Need to create a new group instead of an ability to create sub-groups within the groups • Missing to take action against offenders / trolls within the group	• Less time in group management • Distributed responsibilities to manage group communication, hence no message is left without response • Creating separate group and sub-groups hierarchy	• Create sub-groups within groups (tree structure) for better management • Pin the important messages in group chat instead of sending them again and again • Take actions against offenders / trolls within your group • Better and effective way to manage groups

← What are the success factors?

How do we know our feature is successful?

Success Factors	Measure	Target	Threshold
New Market Acceptance	# of new tree structured groups & sub-groups created post release	60% increase from the existing number	• Less than 40% : Red • 40%to 60% : Amber • 50% and above : Green
	# of new subscribers or installs	40% increase from the existing number	• Less than 20% : Red • 20%to 40% : Amber • 50% and above : Green
	% increase in data consumption under group chats	40% increase from the existing number	• Less than 20% : Red • 20%to 40% : Amber • 50% and above : Green

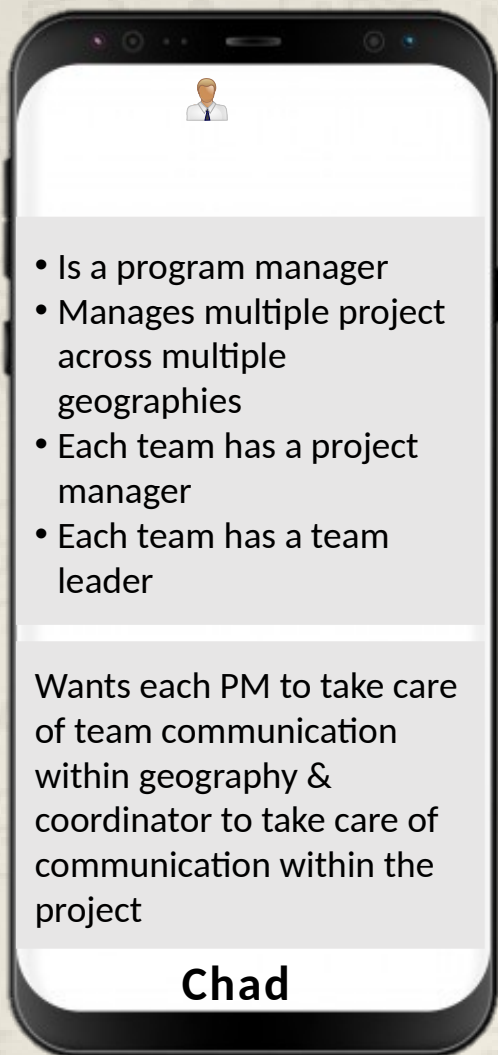

← How can personas use this feature?

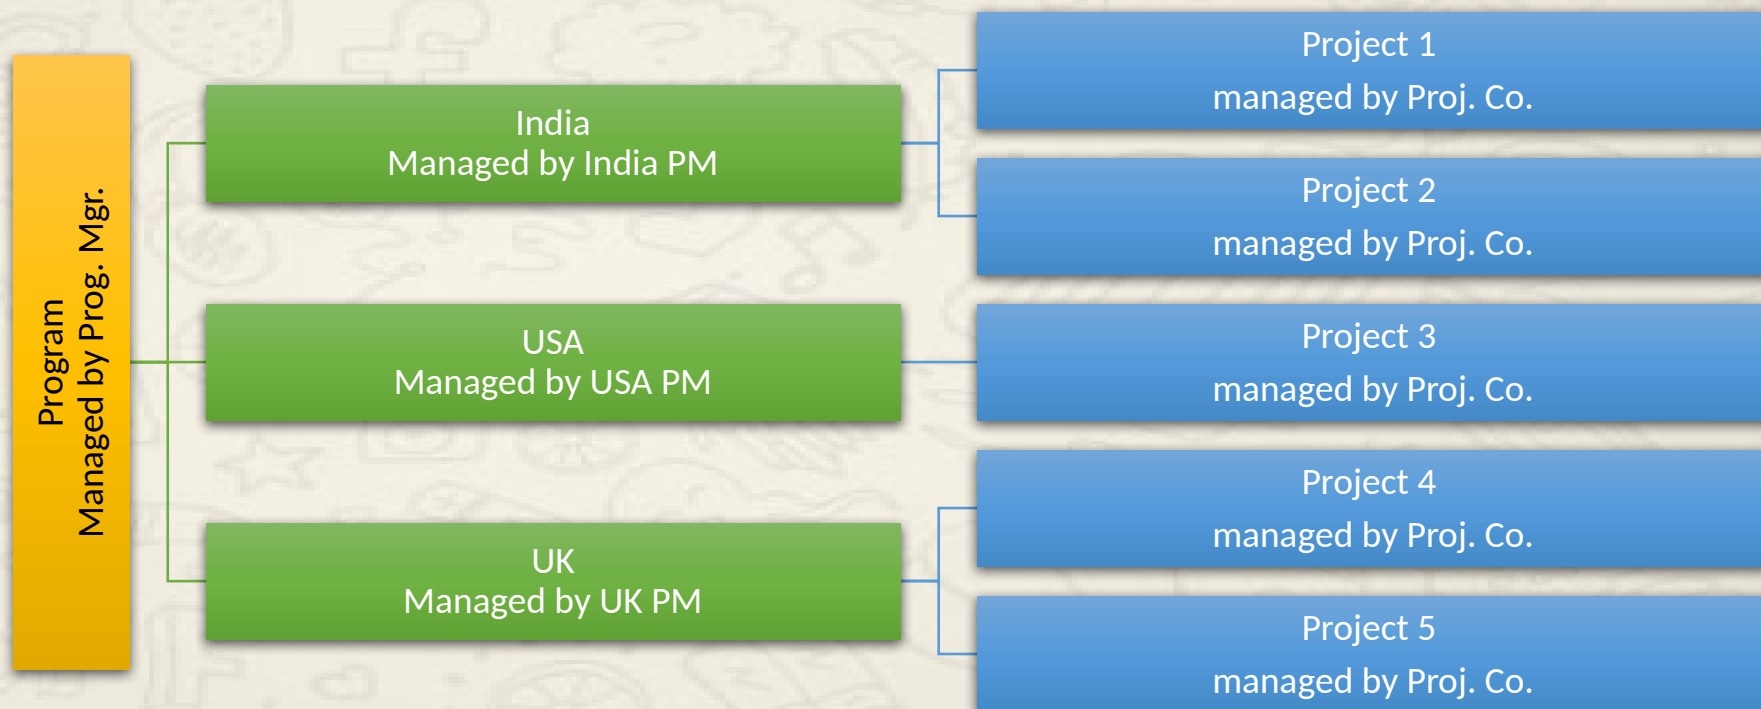

- John creates a group called – Product Z
- Creates sub-groups per geography
- Assign moderators for those groups and becomes admin for them

← How can personas use this feature?

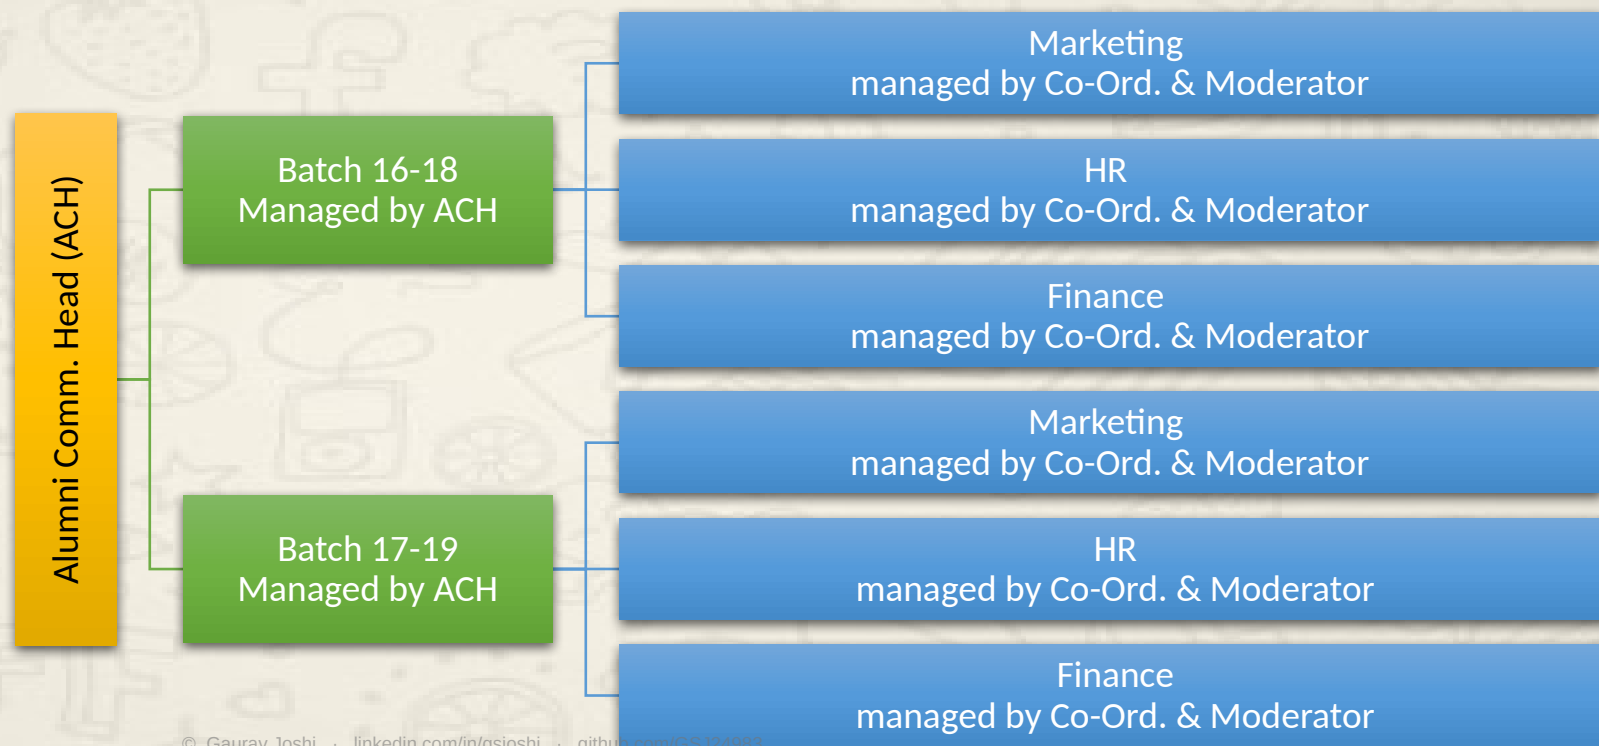

- Chad creates a 3 groups per geography
- Creates project-wise sub-groups per geography
- Assign moderators for sub-groups
- Assign PM's as Admins for geography-wise groups

← How can personas use this feature?

- Susan creates a 2 groups per batch
- Creates specialization-wise sub-groups per batch
- Assign admins and moderators for specialization sub-groups
- Assign admins and moderators for batch-wise groups

Agenda

Why?

What?

How?

What are the additional details about this feature?

- What are potential revenue opportunities?
- Assumptions
- References

What are potential revenue opportunities?

Currently there is no revenue from Users of WhatsApp. However considering ownership from Facebook, this feature can assist in:

New Market Segments
(Casual to Professional Users)

In-app
Purchases

Targeted
Marketing

Even though currently WhatsApp is free; it can target for certain Average Revenue per Customer. For example: Consider ARPU for following apps-

- WeChat = 7 USD
- Line = 9 USD

WhatsApp has reached 'Maturity' level of product lifecycle

WhatsApp has a strategy to expand market segments

As per existing User Experience data, creation of groups & sub-groups along with additional role of moderator won't be complicated for majority of users

WhatsApp would be looking to generate revenue from customers in future
