

GAURAV JOSHI

Vice President, JPMorgan Chase | Product Management Leader | Travel E-Commerce & Loyalty Platforms | Greenfield Zero-to-One | AI Product Initiatives

+91-9823466677 | kavee.gauravjoshi@gmail.com | [linkedin.com/in/gsjoshi](https://www.linkedin.com/in/gsjoshi) | Pune, India

PROFESSIONAL SUMMARY

Product leader, 18+ years, taking undefined mandates to shipped and adopted products across travel, e-commerce, media & entertainment, loyalty redemption and regulated enterprise platforms. Five cold starts in five domains - no data, no team, no precedent - where most people at this level have inherited a roadmap every time. Most recently on a platform processing ~\$25M monthly GTV with a 27-person cross-functional team. Delivery across India, South Africa and the UK.

WHAT I AM KNOWN FOR

- Zero-to-one across five domains - travel, loyalty, banking, procurement and media - each starting without a roadmap, a dataset or a team.
- Getting work moved where there is no reporting line: 15+ product teams to full regulatory compliance, and a national contact centre stood up while working as a contractor.
- Building things that outlive the initiative - a supplier error taxonomy, a decision-table method other product teams adopted, an analysis framework that shipped as a product module.
- Turning frameworks into working software: the Goal-Based Travel Package model exists as a coded, demonstrable prototype, not a deck.

PROFESSIONAL EXPERIENCE

Vice President, Product Management - Travel & Cross-Product Strategy | JPMorgan Chase & Co. | Feb 2020 - Present

- Lead product for a partner travel and loyalty platform processing ~\$25M monthly GTV across flights, hotel, car and activities, with a 27-person cross-functional team spanning product, engineering, data and UX.
- Managed 4 product managers through the cloud migration programme, each owning an independent partner workstream, with dotted-line decision authority over their engineering and architecture teams; held consolidated delivery accountability.
- Delivered 100% client adoption of the cloud loyalty redemption platform - 3 launches for 5 enterprise clients, 10+ clients migrated, zero critical defects, zero downtime.
- Inherited a stalled supplier-error workstream (FIFT) and drove it to outcome: support alerts down 50% and booking failures down 30% across 9 suppliers. Set the sequencing basis (alert volume against booking impact) and held the resolution cadence with API and connector teams; ground-level taxonomy analysis was owned by a product analyst on the workstream.
- Led enterprise dark-pattern regulatory compliance (FTC, CA, TX, MA; equivalent to India CPA 2019 and DPDP Act 2023) across 15+ product teams and 30-40 stakeholders with no direct authority - built the governance model, translated regulation into product-level decisions, 100% compliant within mandated timelines.
- Sole owner of cross-product greenfield initiatives with no data, benchmarks or team: scope definition, primary and secondary research, GTM strategy, feature mapping, mock screens, business case and cost-benefit analysis through to PoC funding decisions.
- Designed the Goal-Based Travel Package framework - multi-criteria and affinity scoring, Strategy Canvas, personas, 100-user primary research with Chase cardholders - then built it rather than leaving it in documents: a working prototype coded solo at an internal hackathon (JavaScript scoring engine, externalised configuration, HTML output layer rendering each package with a visual justification of its score), demonstrated internally.
- Proposed a redesigned enterprise client onboarding operating model - process mapping, waste elimination, automation opportunities and cross-functional RACI - estimated to move onboarding from 6-8 months to ~3 months including client UAT.

Solution Architect / Senior Business Analyst | Cybage Software Pvt. Ltd. | May 2015 - Feb 2020

- Owned product definition for foundational platform components - role-based access control and a configurable rules engine - anchoring ambiguous and continuously shifting architectural direction in business context so decisions stayed business-led.
- Managed 3 senior business analysts on independent module workstreams while holding consolidated roadmap accountability; mentored 5 junior analysts through BABOK-anchored training content built in-house.
- Launched an enterprise leave management product and a helpdesk support product within 18 months, introducing a decision-table method for complex business rules that other product teams adopted as practice.

Enterprise Transformation Consultant / Product Owner | Nihilent Technologies & Medscheme | Feb 2008 - May 2015

- Customer loyalty evaluation product: took a CEO's 8-page concept to a commercially launched B2B2C product in 12 months - full documentation stack, segmentation, positioning and pricing, client PoC and launch. Ran primary research on a near-zero budget by recruiting MBA students on the vision, using the survey for both pricing input and qualified leads, and built an analysis framework that became a standard product feature.
- Standard Bank South Africa: built the business case and cost-benefit analysis for centralised procurement, then stood up a 12-person procure-to-pay contact centre PoC in 3 months across 5 live branches with no operational disruption - as a contractor with no formal authority. Rolled out nationally as Project Prologue; CIPS award winner.
- SuperSport and M-Net, South Africa: onsite lead for a content contracts, scheduling and inventory platform - 7 consecutive enterprise releases over 2.5 years, with 2 analysts reporting in and an offshore team of 30-40.

- Banking Association South Africa: strategy map and balanced scorecard automation in 6 months, translating organisational objectives into KPIs, data elements and calculation logic. Taught as a strategy execution case study at the University of the Witwatersrand.
- Medscheme, South Africa (Proxy Product Owner): owned the backlog for a bespoke healthcare core system upgrade with 3 business analysts on independent modules, and built the ROI-tracking business case.

AI PRODUCT WORK

- Tata Safari AI Assistant (live, 2026): built and deployed a RAG assistant solo end to end - document ingestion, semantic chunking, grounded answers via the Google Gemini API, natural-language and image queries, deployed on Streamlit Cloud. <https://safari-ai-assistant-gsj24983.streamlit.app>
- LLM-assisted resume review at JPMC: 292 resumes against 24 evaluation questions, review time cut from 30 to 7-8 minutes (~75%), 100+ hours saved, full audit trail, human-in-the-loop throughout.
- Analysed detractor voice-of-customer data, supplier content and regulatory verbiage to surface 3 causal loops driving compliance risk and NPS damage; converted them into two validated solutions - a readability redesign of lodging policy and cancellation content, and automated scanning of supplier content against regulatory sources to flag risky terms and trigger action. Both handed to owning teams and on their backlogs.

CORE SKILLS

Product Leadership: Product Strategy | Zero-to-One Discovery | Greenfield Innovation | Product Roadmap | Lifecycle Management | MVP Definition | Go-to-Market Strategy | OKRs & KPIs | Prioritisation Frameworks

Discovery & Research: Primary and Secondary Research | Persona Development | Affinity & Multi-Criteria Scoring | Strategy Canvas | Competitive Analysis | Business Case | Cost-Benefit Analysis

Delivery & Leadership: Cross-Functional Leadership | Influence Without Authority | People and Workstream Management | Stakeholder Management | Agile & SAFe | Backlog Management | RACI | Mentoring

Domain: Travel E-Commerce | Loyalty & Redemption | Enterprise Platforms | BFSI | Regulatory Compliance (FTC, CA, TX, MA, India CPA 2019, DPDP Act 2023) | API & Supplier Integrations | Cloud Migration

Tools: Jira | Jira Align | Confluence | Balsamiq | Roadmunk | Grafana | Kibana | SAS | MS Visio | TFS

CERTIFICATIONS & ONGOING TRAINING

- Designing and Building AI Products and Services - Massachusetts Institute of Technology (MIT xPRO). In progress, 2026.
- SAFe Product Owner / Product Manager (POPM) - Scaled Agile | Certified Scrum Product Owner (CSPO) - Scrum Alliance | Certified Business Analysis Professional (CBAP) - IIBA

EDUCATION

P.G.D.B.M. Marketing | Indira School of Business Studies, Pune | 2006-08

B.E. Instrumentation Engineering | D. Y. Patil College of Engineering, Pune | 2001-05

AWARDS, PUBLICATIONS & RECOGNITION

- Winner, CIPS Southern Africa Best Process Improvement Initiative 2010 (Standard Bank South Africa). Outstanding Alumni Award. Nihilent Best Team Award.
- Contributor, IIBA Product Ownership Analysis Guide. Author, white paper: Smart Content Scheduling using the Analytic Hierarchy Process (AHP). Speaker, IPA Summit. Featured case study, University of the Witwatersrand (WITS).
